**Changing Children's Behavior by Changing the People, Places, and Activities in Their Lives** Richard Munger, 2011-01-01 Without going through the experience no one can really know how it feels to have to look for a job The pain and uncertainty of putting yourself out there having to ask total strangers to take a chance on you and the crushing defeat one feels when that dreaded rejection letter or email shows up Even if you are completely qualified for the position the lack of certainty can wear on you like nothing else Hunting for a job simply isn't fun In this book you will learn nine powerful ways to find and get jobs even if your background includes some criminal activity You may think there's no hope but if you read and follow these secrets you will find that jobs are easier to find than you ever thought An incredibly powerful resource for finding a job especially if you have a felony I cannot recommend this book more highly I found a job in record time using just a couple of these secrets John Klien Former Inmate FCI Sheridan

**How To Change Teenager's Behavior** Steven T. Griggs, Ph.D., 2018-07-03 I've been a practicing psychologist in an outpatient setting for over thirty two years I run into eight conditions or issues almost every day addictions anxiety ADHD learning disabilities assertiveness children's behaviors mood disorders relationships and self esteem Teenager's behavior is a subset of children's behavior and is especially problematic Parents usually don't know what to do during this rite of passage this potentially very troublesome period kids go through I've developed a unique set of techniques but also a philosophy that works very well with both younger kids and teenagers It applies principles of behavior change with an understanding of what teenager's experience The result is that parents and teens re connect and behavior changes usually on the part of both Here's the overview of what's in this latest ebook First there is a description of the terms I use throughout the manuscript Teachers and people familiar with therapy will recognize some of them Others are unique to me There's eight or nine you need to know Then we get down to business I start by guiding you through behavior selection that is what is it you want to change about your teen This is straightforward but the twist is that I don't work primarily with negative behaviors rather I focus on the opposite of them the ones that are positive and cancel out the negative ones This is unique In the literature there are three ways to reinforce behaviors but my way is the fourth You won't find this anywhere else Ever heard of the Four To One Rule Not likely because it's something I discovered over years of practice I use it specifically with

the technique just described This is what I use instead of punishment whenever possible Just in case you think punishment is not discussed there are several pages devoted to just this concept where and when to use it but most importantly when and why not to use it Next comes a section on Philosophy Strategies and Examples There are lots and lots of examples I have another unique to me concept The Dance This is the intricate interaction parents and children experience from day one to maturity I describe it in detail and how to conceptualize it to manage errant teen behaviors Because teenagers are beset not to mention hugely burdened by hormones they react to situations in an exaggerated way I describe how to assess this and when to call in a specialist In other words what is normal and what is not normal behavior at this age Many parents do not know This brings into discussion teenager s needs followed by a discussion of teen s moods both amplified by developmental stage and again by hormones Needs and moods are discussed in the context of the twelve most common areas of conflict between parents and teenagers Out of home activities curfews privacy safety electronics comparative age makeup dating and sex driving grades criminal behaviors drugs and alcohol and visitation between parents if they are divorced Specific examples of each are provided and how to handle them The next section is called Putting It All Together In detail I describe exactly what to do with your teenager given any particular problem area The last section deals with kids who are outside the scope of my ebook or any self help manuscript These are the kids who have significant compromises sometimes through no fault of their own Medical conditions personality disorders deliberate maliciousness medication RTC s and lastly being the victims of nasty parental divorces are covered These conditions slow down parent s ability to connect with their teens although my techniques still work to quell the fires of rebellion How to deal with the deeper stuff is what I cover here and why these have to be addressed before anything else will work including what I have to offer Ebooks are evolving and now have considerable depth Usually they and mine specifically are single subject treatises They deal with just one topic how to s about any given problem This one is is aimed specifically at teen behaviors and what to do about them It s concise loaded with relevant information and immediately available Regular books require more effort to obtain and they cost more Most of these books are too long I ve boiled down the concepts in these books but have added my own unique views and experience And I ve made this as easy to understand as is humanly possible Like my other ebooks this one has no fat Think of it as a Cliffs Notes publication It s sort of a quick read about two hours on average I have to explain a few new terms because there are new ideas and the terms you probably already know are put together in new ways The theory I espouse is different from standard behavior change books It works better and is very simple to understand That s the point of an ebook My research has not turned up another ebook that does what mine does
