Changing Families Bob Simpson, 2020-08-26 Recent decades have seen spectacular increases in the levels of divorce and separation across the Western world This important development is having a radical impact on the conduct and nature of family relationships This book offers an original investigation of these critical transformations through an ethnographic analysis of post divorce family life in Britain and provides insightful answers to vexing questions such as What cultural values and ideologies motivate and shape concerns over relationships when marriage ends Which relationships continue and why What cultural values underpin the financial transactions that take place or more commonly fail to take place after divorce Drawing on extensive interviews with those most affected by divorce the author argues that the positive sentiments traditionally associated with the notion of kinship are wholly inadequate when it comes to understanding divorce but that kinship can provide an illuminating window through which to consider the breakdown of marital relations This book represents a significant contribution to current debates over the changing form and expression of relationships in Western society in the late twentieth century

Changing families and their lifestyles H. Moerbeek, A. Niehof, J. van Ophem, 2023-08-28 This volume comprises contributions from several fields of study in the social sciences The different disciplinary angles intersect at the level of the research subjects families households and consumers Together they reflect a broad field of study that always had its particular niche in Wageningen as household and consumer studies The five separate parts the formation and dissolution of families stratification and inequality consumer and household behaviour leisure time and hygiene health and society nicely reflect the broadness of this field The eighteen contributions in this volume were purposefully selected not only based on their contents and quality but also because of their relationship to the work of Kees de Hoog who retired this year Although Kees de Hoog is a professor of family sociology and family policy his work throughout the years has extended far beyond that and covers the fields that are captured by the different parts in this book Therefore the contributions in this volume comprise

an interesting read for scholars all over the world who have an interest in families consumers households and the ways they interface

Changing Families Irving E. Sigel, 2012-12-06 In a previous volume Families as Learning Environments for Children we presented a series of chapters that dealt with research programs on the role of families as learning environments for children Those studies were based on empirical data and sought answers to basic research questions with no explicit concern for the application of the results to practical problems Rather their purpose was to contribute primarily to conceptualization research methodology and psychological theory Now in this volume we turn our attention to intervention efforts to modify the way a family develops As in our previous conference the participants of the working conference on

which the present volume is based are research scientists and scholars interested in application. This group is distinct from practitioners however whose primary focus is service participants in this conference have as their primary interest research into the problems of processes of application. Applied professional issues concerning the lives of families come from many varied sources from some that are distant and impersonal e.g. the law to direct face to face efforts educators therapists. The variety of sources and types of applications are eloquent testimony to the degree to which families are subject to a host of societal forces whose implicit or explicit aim is to modify family functioning. For example some educators may wish to alter family child rearing patterns to enhance child development the clinician seeks to help families come to terms and to cope with a schizophrenic child. The list can be extended.

Changing Families Sally Ives Loughridge, David Fassler, Michele Lash, 1987. Provides advice on coping with such family changes as separation divorce remarriage new family members and new schools.

Changing Families, Changing Responsibilities Marilyn Coleman, Lawrence Ganong, 1999-05-01. This book explores the topic of family obligations following changes in family structure caused by divorce and remarriage. Family obligations are commonly defined as the rights and duties that accompany family roles. They have been described as the glue that connects generations as well as the oughts and shoulds that surround individual family relationships. This book is primarily concerned with normative beliefs about what family members should do for each other. It differs from previous accounts of family obligation norms because it specifically focuses on family responsibilities after divorce and remarriage two events that affect an increasing number of families today. The authors draw extensively upon the findings of 13 studies of normative beliefs regarding post divorce intergenerational family obligations. This book fills a gap in the present literature concerning family obligation. It addresses the weaknesses of prior research by focusing on family transitions and by presenting data from studies that employ contextual methods. The content will provide guidance to policymakers and helping professionals who work with families and the unique focus and procedures of the studies are likely to set the standard for future assessments of normative beliefs about family obligations.

Changing Gender Relations, Changing Families Oriel Sullivan, 2006-04-27 It s common knowledge that responsibilities in the home are not divided equally between men and women Most sociological studies of this phenomenon focus on why these gender differences are so persistent persistent enough to have earned names like the dual burden and the second shift Feminists bemoan how slowly this gender gap is changing Sociologist Oriel Sullivan however focuses on the neglected topic of the processes of change discussing changing domestic gender practices on many different levels from changes in attitudes about gender equality in the home to the quantitative analysis of change in the domestic division of labor Sullivan argues that it s time to consider these issues from a longer historical perspective *Changing Genders* *Changing Families* argues for an acceptance that change is with us presents multi layered evidence for change and offers a theoretical structure that is useful for developing an account of these processes of change His newly developed theoretical approach connects the wider discussion of gender practices within the home to the interactions and negotiations that individuals engage in on a day to day basis He includes empirical evidence for change presenting findings based upon directly comparable cross national data from the mid 1960s to the late 1990s This book will appeal to readers interested in gender studies sociology and in the changing gender equity of the home
