Changing Language Teaching Through Language Testing A Washback Study:

Changing Language Teaching Through Language Testing Liying Cheng, 2005-10-06 There has been growing interest in recent years in the influence of tests on teaching and learning a phenomenon commonly referred to as washback Despite persistent assertions about its nature and scope empirical studies investigating test washback are still limited in number and few of these make use of both qualitative and quantitative methods in washback research This volume presents a study of how the introduction of the 1996 Hong Kong Certificate of Education in English a high stakes public examination impacted on classroom teaching and learning in Hong Kong secondary schools The washback effect was observed initially at the larger macro level among different stakeholder groups within the Hong Kong educational context and also at the more local micro level in terms of teachers attitudes teaching content and classroom interactions This study provides a theoretical background to the washback concept discusses the need for empirical investigation of washback describes the use of a mixed methodology approach in washback research offers insights into the role of tests as agents of innovation and change in the classroom and broader educational context This volume will be of particular relevance to language test developers and researchers interested in the consequential validity of tests it will also be of interest to teachers curriculum designers policymakers and others in education concerned with the interface between language testing and teaching practices programs Book jacket

The Routledge Handbook of Language Testing Glenn Fulcher, Luke Harding, 2021-12-15 This second edition of *The Routledge Handbook of Language Testing* provides an updated and comprehensive account of the area of language testing and assessment The volume brings together 35 authoritative articles divided into ten sections written by 51 leading specialists from around the world There are five entirely new chapters covering the four skills reading writing listening and speaking as well as a new entry on corpus linguistics and language testing The remaining 30 chapters have been revised often extensively or entirely rewritten with new authorship teams at the helm reflecting new generations of expertise in the field With a dedicated section on technology in language testing reflecting current trends in the field the Handbook also includes an extended epilogue written by Harding and Fulcher contemplating what has changed between the first and second editions and charting a trajectory for the field of language testing and assessment Providing a basis for discussion project work and the design of both language tests themselves and related validation research this Handbook represents an invaluable resource for students researchers and practitioners working in language testing and assessment and the wider field of language education

Teacher Involvement in High-Stakes Language Testing Daniel Xerri, Patricia Vella Briffa, 2018-04-27 This book advocates that teachers should play an active role in high stakes language testing and that more weight should be given to teacher judgement This is likely to increase the formative potential of high stakes tests and provide teachers with a sense of ownership The implication is that the knowledge and skills they develop by being involved in these tests will feed into their own classroom practices The book also considers the arguments against

teacher involvement e.g. the contention that teacher involvement might entrench the practice of teaching to the test or that teachers should not be actively involved in high stakes language testing because their judgement is insufficiently reliable. Using contributions from a wide range of international educational contexts the book proposes that a lack of reliability in teacher judgement is best addressed by means of training and not by barring educators from participating in high stakes language testing. It also argues that their involvement in testing helps teachers to bolster confidence in their own judgement and develop their assessment literacy. Moreover teacher involvement empowers them to play a role in reforming high stakes language testing so that it is more equitable and more likely to enhance classroom practices. High stakes language tests that adopt such an inclusive approach facilitate more effective learning on the part of teachers which ultimately benefits all their students.

Washback in Language Testing Liying Cheng, Yoshinori Watanabe, WITH Andy Curtis, 2004-02-04. Washback refers to the influence of language testing on teaching and learning. This volume at the important intersection of language testing and teaching practices presents theoretical, methodological and practical guidance for current and future washback studies. In the field of language testing researchers' major interest has traditionally been focused on issues and solving problems inherent in tests in order to increase their reliability and validity. However the washback effect goes well beyond the test itself to include factors such as curriculum, teacher and learner behaviors inside and outside the classroom, their perceptions of the test and how test scores are used. Only recently have researchers started to empirically investigate the phenomenon of washback. This volume of such research serves two essential purposes by providing an overview of the complexity of washback and the various contextual factors entangled within testing, teaching and learning and presenting empirical studies from around the world that offer insights into the effects of washback in specific educational contexts and models of research on which future studies can be based. The extensive use of test scores for various educational and social purposes in society nowadays makes the washback effect a high interest phenomenon in the day to day educational activities of teachers, researchers, program coordinators, directors, policymakers and others in the field of education. *Washback in Language Testing: Research Contexts and Methods* is a valuable resource for those who are interested in the application of findings to actual teaching and learning situations or conduct washback research in their own contexts including educational and psychological testing experts as well as alternative assessment people in all fields and for policy and decision makers in educational and testing organizations.

Handbook of Second Language Assessment Dina Tsagari, Jayanti Banerjee, 2016-03-07. Second language assessment is ubiquitous. It has found its way from education into questions about access to professions and migration. This volume focuses on the main debates and research advances in second language assessment in the last fifty years or so, showing the influence of linguistics, politics, philosophy, psychology, sociology and psychometrics. There are four parts which when taken together address the principles and practices of second language assessment while considering its impact on society. Read separately each part addresses a different aspect of the field. Part I

deals with the conceptual foundations of second language assessment with chapters on the purposes of assessment and standards and frameworks as well as matters of scoring quality assurance and test validation Part II addresses the theory and practice of assessing different second language skills including aspects like intercultural competence and fluency Part III examines the challenges and opportunities of second language assessment in a range of contexts In addition to chapters on second language assessment on a national scale there are chapters on learning oriented assessment as well as the uses of second language assessment in the workplace and for migration Part IV examines a selection of important issues in the field that deserve attention These include the alignment of language examinations to external frameworks the increasing use of technology to both deliver and score second language tests the responsibilities associated with assessing test takers with special needs the concept of voice in second language assessment and assessment literacy for teachers and other test and score users
