Changing Places In New Zealand Geography Of Restructuring:

Changing Places in New Zealand Stephen G. Britton, Richard B. Le Heron, Eric Pawson, 1992 *The Sustainability of Rural Systems* I.R. Bowler, C.R. Bryant, C. Cocklin, 2013-06-29 Economy, society and environment comprise the three main dimensions of sustainable development but too often they are considered separately. This book, by comparison, examines the interaction of the three dimensions in the context of rural systems embracing a wide range of topics including globalisation and reregulation in sustainable food production, conservation and sustainability, the development of sustainable rural communities and sustainable rural-urban interaction. An international team of geographers drawn from the International Geographical Union's Commission on The Sustainability of Rural Systems summarises the basis of unsustainable rural development in these topics, the remedial policies being pursued and their own evaluations of the policies. Rather than deal just with generalisations, their analyses are illustrated by detailed case studies drawn from a variety of rural systems in both developed and developing countries.

Transformation of Resource Towns and Peripheries Greg Halseth, 2016-07-01 Most developed economies including single industry and resource dependent rural or small town regions are transforming rapidly as a result of social, political and economic change. Collectively they face a number of challenges as well as new opportunities. This international collaboration describes a critical political economy framework that will be useful for understanding these transitions. *Transformation of Resource Towns and Peripheries* describes the multi-faceted process of transition and change in resource dependent rural and small town regions since the end of the Second World War. The book incorporates international case studies from Australia, Canada, Finland and New Zealand with the express purpose of highlighting similarities and differences in patterns and practices in each country. Chapters explore three main themes: how corporate ties and trade linkages are changing and impacting rural communities and regions; how resource industry employment is changing in these small communities; and how local community capacity and leadership are working to mitigate challenges and take advantage of new opportunities. This book will be of interest to students of regional studies, geography and rural and industrial sociology. It will also have a strong appeal to policy makers and local regional development practitioners.

Handbook of Rural Studies Paul Cloke, Terry Marsden, Patrick Mooney, 2006-01-05 This book raises the theoretical level of rural studies to new heights. The *Handbook of Rural Studies* will likely become a key resource on the bookshelves of the next generation of graduate students. Gary Paul Green, University of Wisconsin-Madison. This Handbook powerfully demonstrates that rural spaces, rural societies and rural natures are at the very forefront of critical social science endeavour. Read this book, become a rural social scientist. Henry Buller, University of Exeter. An outstandingly comprehensive review of theory, research and the study of rural questions: an essential reference for students, scholars, politicians, developers and rural activists. Imre Kovach, Institute for Political Sciences, Budapest. This collection is an essential addition to any rural scholar's library and will be a critical resource for both established rural scholars and rising graduate students interested in rural

research topics Peter B Nelson Middlebury College The Handbook of Rural Studies is a tour de force on changing rural people and places in a rapidly urbanizing global economy the most comprehensive interdisciplinary treatment of rural available anywhere This is absolutely must reading for social scientists concerned about finding a prominent place for rural in scholarly discourse institutional analysis and public policy debates on the political economy of space Daniel T Lichter Policy Analysis and Management Cornell University The Handbook represents the vitality and theoretical innovation at work in rural studies It shows how political economy and the cultural turn have led to very significant new thinking in the cultural representations of rurality nature sustainability new economies power and rurality new consumerism and exclusion and rurality It is organized in three sections approaches to rural studies rural research key theoretical coordinates and new rural relations In a rich and textured discussion the Handbook of Rural Studies explains the key moments in which the theorization of culture nature politics agency and space in rural contexts have transmitted ideas back into wider social science

Changing Places Richard B. Le Heron, Eric Pawson, 1996 In the nineties New Zealand entered a period of rapid and comprehensive change which has become widely known outside the country as the New Zealand experiment Changing places New Zealand in the nineties captures the dramatic changes over the last decade and provides a map to help interpret the complexity How are we connected to other places In what ways are we re discovering our own places How and through whose agency is change being regulated particularly in view of the common understanding that deregulation is the order of the day To what extent is change in localities a result of global influences Changing places New Zealand in the nineties is the successor to Changing places in New Zealand a geography of restructuring In this new book the authors have concentrated on issues of the mid 1990s globalisation corporate strategies labour flexibility social policy sustainability urban and regional futures patterns of consumption and how all these are affecting people s senses of place Using the Geographic Restructuring model which was developed in the first book the authors simultaneously give an outside and an inside view of the past ten years of change allowing the restructuring of the 1980s and 1990s to be seen as a fusion of both the country s participation in global restructuring and particular interactions arising from local and national initiatives The model raises fundamental changes in New Zealand society and how agents in different social spheres are behaving in the new economic and institutional milieu We come closer to establishing why and by what means particular interests have been able to influence directions of change Back cover

Embedded Enterprise and Social Capital Simon Leonard, 2017-11-22 This title was first published in 2002 The concept of embeddedness refers to the social construction of inter firm relationships and the enmeshing of economic relationships within broader social structures and relationships in particular places Previous research has suggested embedding is the best way to generate local growth and social capital and has focused on SMEs in Europe and North America although the existing model is being more widely adopted now This volume is the first to examine the complex processes of embedding in this wider context Bringing together a broad range of case studies from the

developed and developing world which address the nature of embeddedness from various perspectives it not only questions the universality of the current model and the policy initiatives it has spawned but also provides a much wider understanding of embeddedness It does so by discussing the social dimensions more fully and by throwing light on the spatial and temporal ambiguity of the concept and its inadequate treatment of power *Environmental Planning in New Zealand* P. Ali Memon,Harvey C. Perkins,1993 *New Zealand Journal of Geography* ,1997 Globalization and Agri-food Restructuring David Burch,Roy E.
