Abstract: Children's cognitive development is an inevitable part in the education of children. This paper discusses the relationship between children's language learning and cognitive development processes by literature review. Language learning consists of two parts, vocabulary learning and grammar learning. Special educational needs about the language acquisition of deaf children are also considered. Language learning is positive to children development of theory of mind and episodic memory. This paper may offer some references for promoting children's early education.

Keywords: Cognitive development, Memory language learning, Children development

1. Introduction

Traditionally, cognitive development is considered to be the acquisition of knowledge through simple learning processes, or the reorganization of knowledge. These are referred to as the learning theory view and the stage theory view respectively. This paper first displays children's cognitive development and discuss the role of language in cognitive development. This part includes three types of development: conceptual development, a theory of mind development and episodic memory development. Early language learning is significant of children's memory develop, make our learning and memory more organized and detailed. The section below describes more early language learning and the relation with children cognitive development. This paper displays three point of views in language learning, there are vocabulary development, grammatical development and deaf children language learning. The aim of this paper is to integrate the links between developmental psychology and language learning. It also gives some examples to discuss some positive and negative situations.

2. Children's Cognitive Development

Donald's theory is that the cultures define the main stages of the evolution of mind. In other words, the cognition and culture are mutually constitutive [1]. In Vygotsky's view of cognitive development, language is crucial. Language is the primary symbolic system, according to Vygotsky, and once learned, it will mediate cognitive growth. Follow speech becomes internalized (also known as "inner speech") and is crucial in structuring the cognitive activity of the kids. Culture transmits "sign systems" or "psychological instruments" like writing, language and art. Plowden was clearly indicate that the central to the educational process is development of language.
