Easy Learning Ping Makarsky, 2012-01-26 Easy Learning Chinese Characters is designed for English speakers or anyone who has a good command of the English language. Unlike Chinese speakers, English speakers are used to a phonetic writing system that is what they read is what they hear. When they see an English word they expect its letters to tell them the pronunciation and recognize its meaning. Thus English speakers find Chinese characters to be too complicated and confusing because they cannot pronounce them easily. Without a phonetic system they have to find the pronunciations through pinyin and then find the meaning. Therefore English speakers think they need extra time to learn to connect the graphic shapes of Chinese characters with their pronunciation. So learning the Chinese language can seem like learning two different languages: one for listening and speaking and the other for reading and writing. However, if you can master the methods of learning Chinese characters in this book, you will get twice the results with half the effort. Easy Learning Chinese Characters can make your Chinese character learning process easy and fun. It is intended to be an intensive course book for English speakers who have just started to learn Chinese writing. Anyone who has pinyin as a foundation can study this book by themselves. This book has 86 lessons in total with detailed explanations of 550 basic Chinese characters and over 2400 Chinese words and phrases. This gives learners the foundation from which they can expand to read the 4000 basic Chinese characters. With basic knowledge of the evolutionary history of Chinese characters, learners will gain a brand new perspective and profound understanding during the learning process. Over 90% of the characters in Easy Learning Chinese Characters are accompanied with pictures showing how the character evolved from its

original shape to its current simplified form Only less than 1% of the characters in this book may need to be memorized mechanically but even they are provided with vivid pictures to help remember them All of the characters words and phrases are provided with detailed pronunciation in pinyin So all the lessons taught in this book should be easily mastered by new learners All languages are connected Chinese is similar to English in numerous ways Pictophonetic characters make up over 90% of all Chinese characters By mastering the rules of pictophonetic characters one can read most of the characters Chinese radicals the part of a Chinese character which represents its meaning are like English monograms Monograms represent the meaning of words for example words containing astro are mostly related to stars Easy Learning Chinese Characters focuses on teaching you to master basic character forms including pictographic characters self explanatory characters and ideographic characters These make up the foundation of all characters This book references several Chinese language sources in order to provide precise and detailed explanations of each character These sources include The Contemporary Chinese Dictionary Advanced Chinese Characters Dictionary Kangxi Dictionary and Shuowen Jiezi Explaining Simple and Analyzing Compound Characters With the help of Easy Learning Chinese Characters learners will have the confidence to master Chinese reading and writing in a relatively short period of time

Simplified Chinese Character Dictionary Adrian Van Amstel, 2016-08-19 Do you often have difficulty finding a particular character in a standard Chinese dictionary Do you often fail to remember characters though you have seen and looked them up several times Don't you think one of the reasons could be that characters that look similar to others are not grouped together And don't you think that the etymological background of characters their historical development could and should be explained better in order to understand the reason for all those dots and strokes If your answer to these questions is yes then help could be on its way within seconds The Simplified Chinese Character Dictionary and its parent the Chinese Character Dictionary both contain several new features that make looking up learning and remembering Chinese characters more effective and more fun characters are arranged by the phonetic part that in most characters is relatively easy to distinguish by grouping characters that have the same phonetic into series characters that look almost similar can be compared and studied together any character can be found by stripping it first of its radicals and then splitting the remaining phonetic into components Phonetic and character can then be found under one of these components more than 5 700 different character shapes can be found using the same 3 step method Examples are given of their usage in daily or literary Chinese and many pinyin transliterations are given counting strokes is not necessary most characters can be found within seconds almost all phonetics are supplied with an etymological explanation which are helpful for better understanding of the historical background of phonetics and characters Moreover they are very effective in helping with remembering characters and distinguishing them from others that look similar a 30 page introduction is included in which the method used for looking up characters is explained step by step and illustrated with many examples It also explains how to distinguish radicals and explains the different kinds of

radicals Moreover the introduction contains a brief overview of the historical development of Chinese characters in general The Simplified Chinese Character Dictionary is based on the Chinese Character Dictionary CCD It differs from the latter in that it only contains simplified character entries If a character has a different traditional version then that is only given in brackets behind its simplified counterpart In contrast the CCD contains both simplified and traditional character entries which can be searched for independently Another difference is that the example words and phrases in the Simplified CCD are entirely in simplified Chinese while in the CCD these are primarily in traditional Chinese The Simplified Chinese Character Dictionary is primarily for students of Chinese in the beginning years of their study who want to focus on learning simplified characters as quickly as possible In contrast the CCD can be used by people who use traditional and or simplified script
