William Oxley, 1878 **Archaeo-Astronometria** Dean Clarke, 2008-10-23 There have been many books on the origin of astronomy some good and some very poorly address the issues of ancient mans interests in the stars The ancient Sumer and Egyptian notions of music mostly confirms how ancient this notion is in their chorded progressions of tone This notion is more an Upper Paleolithic celestial idea In a sense man during this time man was beginning to have a concept of north south east and west in spatial terms It involves the curvature of the ribs of Nut the Egyptian Sky Goddess as a ribbed vaulted sky and sometimes in a horizon sense of a bowing arch of a stars path or the curve of a bone in the stars moving path The half way point of this fall for say our Nut Adam and Eve would thus be about 27 000 BC which falls in a significant period Ice Age re emergence and a deserts expanding in equator regions These are only a small part of what had to addressed in origins of night sky studies The point being this piece as fake or not is that the components of the animals man plants and mans artifacts were very early on displayed We might ask in such a condition what was their night sky If we look at all of these constellations they fall below the Celestial Equator in the South Pole region mostly It would seem that all these birds to them being placed in the night sky like the stars and as they watched what directions the birds along with stars as to where they went in order to ascertain their relations to dusk or dawn night sky What caused the South Africa plight of 80 000 BC The Antarctica had been growing ice forms from 170 000 BC to 80 000 BC towards the north and then around 70 000 BC there seemed to be a melting trend back south In an astronomy sense we can thank him for larger game entering in the pantheon of the constellations or the leaf otter and some constellations lost to time

like the mammoths What does this have to do with constellations taboos or the advent of Cro Magnon man well in the depictions of constellation images Slowly from east to west the stars move but then it did not take man not long after 70 000 BC to note that some planets or stars seemed to move retrograde in the night sky This book address what ideas did they show or have before or after these earth changes As ideas such as Maybe it was a lasso constellation for some animals capture as a God of Capture And Somewhere around the time of 50 000 BC in the region of northern England to the region above the Black Sea there occurred a melting phase between the ice ages and cultures began to spread The evidence of this is found by different locations in Europe and Central Europe of the use of rock shadows stars noted by hands in movement and certain hand symbols by star images or dots as stars not just stab marks Ironic again that Man beside Woman on the pole treetop does not have strong reminders of the Adam Eve Tree and the Serpent as maybe Draco The symbol anciently always shows the snake at the foot of the tree or ascended the tree at the apex of the trunk which if astronomy wise would mean an ascended constellation to the Zenith or the Pole Draco thus deposed Adam and Eve from their own constellation garden and domain by it ascending as an ancient Pole Axis Mundi Thus the smoke screen really is a tied between this local area of France and Late Paleolithic Mans ideas of that region in the night sky of a certain year or month period of hunting Although we have jumped forward in the time of ancient astronomy beginnings in a way really in this sense we have not To the real beginnings of little known ancient astronomy *The Key of Destiny* Frank Homer Curtiss,1919 *The Day of Yahweh* William Arthur Heidel,1929 *The Traveller's Handbook for Egypt and the Sudan* Roy Elston,1929 *Cook's Handbook for Egypt and the Sûdân* Sir Ernest Alfred Wallis Budge,1905 **The Key of Destiny** Harriette Augusta Curtiss, Frank Homer Curtiss,1923 Music Festival ... ,1889 *Oral Traditions and Gender in Early Modern Literary Texts* Mary Ellen Lamb, Karen Bamford,2017-11-28 Proposing a fresh approach to scholarship on the topic this volume explores the cultural meanings especially the gendered meanings of material associated with oral traditions The collection is divided into three sections Part One investigates the evocations of the old nurse as storyteller so prominent in early modern fictions The essays in Part Two investigate women s fashioning of oral traditions to serve their own purposes The third section disturbs the exclusive associations between the feminine and oral traditions to discover implications for masculinity as well Contributors explore the plays of Shakespeare and writings of Spenser Sidney Wroth and the Cavendishes as well as works by less well known or even unknown authors Framed by an introduction by Mary Ellen Lamb and an afterword by Pamela Allen Brown these essays make several important interventions in scholarship in the field They demonstrate the continuing cultural importance of an oral tradition of tales and ballads even if sometimes circulated in manuscript and printed forms Rather than in its mode of transmission contributors posit that the continuing significance of this oral tradition lies instead in the mode of consumption the immediacy of the interaction of the participants *Oral Traditions and Gender in Early Modern Literary Texts* confirms the power of oral traditions to shape and also to unsettle concepts of the masculine as well as of the feminine This

collection usefully complicates any easy assumptions about associations of oral traditions with gender *The Book of God. The Apocalypse of Adam-Oannes. An Introduction to the Apocalypse* Edward Vaughan Hyde Kenealy, 1869 **The Book of God** Edward Vaughan Kenealy, 1870 *The River Nile* R. Said, 2013-10-22 This multidisciplinary book by the author of *The Geology of Egypt* is the result of many years of research. It attempts to reconstruct the history of the River Nile from its origins to its present shape and regimen and also to ascertain the amount of water which has been carried by the river during the course of its history. It examines the manner in which this water was utilized in the past and the ways in which it will have to be used in future if the inhabitants of the river basin are to cope with their anticipated needs. Part One traces the geological history of the Nile from the time it started to excavate its valley some six million years ago until the present shape was assumed during the wet period which affected Africa after the retreat of the ice of the last glacial age some 10 000 years ago. Part Two deals with the amount of water that the river and its tributaries carry at present and have carried in the past. Part Three discusses the utilization of the water of the Nile from the time of the first appearance of man in the valley until the present time. It traces man's attempt to harness the river from the earliest time to the building of the Aswan High Dam. The book evaluates the effects of the dam after twenty years of operation. Part Four covers the present water supply demand balance in each basin state and discusses the future plans of these countries to use the waters of the Nile. The rapidly growing populations and the prolonged droughts of recent years have put pressure upon the available waters of the river.
