What Do We Tell the Children? Joseph M. Primo, 2013-09-17 One out of seven children will lose a parent before they are 20 The statistics are sobering but they are also a call for preparedness However pastors and counselors of all types are often at a loss when dealing with a grieving child Talking to adults about death and grief is difficult it s all the more challenging to talk to children and teens The stakes are high grieving children are high risk for substance abuse promiscuity depression isolation and suicide Yet despite this most of these kids grow up to be normal or exceptional adults But their chance to become healthy adults increases with the support of a loving community Supporting grieving children requires intentionality open communication and patience Rather than avoid all conversations on death or pretend like it never happened normalizing grief and offering support requires us to be in tune with kids through dialogue as they grapple with questions of how and why When listening to children in grief we often have to embrace the mystery offer love and compassion and stick with the basics The author says We don t have to answer the why and how for them but we can assure our children that God is with us as we suffer We can do so by doing good for others and pointing out all of those moments when someone has done something good for us I believe that most of the time that s as far as we will get and that is okay

Children Mourning, Mourning Children Kenneth J. Doka, 2014-01-21 Based on the Hospice Foundation of America's second annual teleconference this book explores three basic themes in children's grief Firstly it maintains that children are always developing therefore their understanding of death and their reactions to illness and loss are also multifaceted and constantly undergoing change Secondly children grieve in ways that are both different from and similar to adults While they may need different therapeutic approaches from their elders each loss is different and the grief experience will be affected by many of the same factors that affect adults Thirdly it holds that they need significant support as they grieve Talking to children about loss and illness is too important to wait until a crisis rather it is essential to provide opportunities to discuss loss in times that are not so Emotionally Laden This Book Aims To Demonstrate That Open Communication between parents and children will lead to skills and understanding that are essential to the child for coping with loss and reaffirming that death is part of the process of living
