Brel And Chanson:

Brel and Chanson Sara Poole,2004-05-19 In celebration of his unique talent and in commemoration of the twenty fifth anniversary of his death this is the first book length study in English of the work of Belgian chansonnier Jacques Brel Brel and Chanson traces probable influences on the creative process of Brel s early later and always eclectic reading It goes on to examine his principal preoccupations as evidenced by the chansons such as childhood love and friendship and human stupidity and also to elucidate the unique use of language This study not only analyzes the complexities inherent in writing and composing but also in the performance of a chanson It considers how Brel s pitiless implication of himself in his every criticism of mankind s shortcomings distinguishes his work This study is of great use to anyone interested in 20th century popular European culture and required reading for all those exploring the rich and vibrant world of chanson **From the**

chanson française to the canzone d'autore in the 1960s and 1970s Dr Rachel Haworth,2015-07-28 The similarities between the chanson française and the canzone d'autore have been often noted but never fully explored Taking a multidisciplinary approach encompassing textual analysis of song lyrics cultural history and popular music studies Rachel Haworth considers the different ways in which French and Italian song is thought about written about and constructed

Georges Brassens and Jacques Brel Chris Tinker,2005-01-01 This book explores the various personal and social narratives within the songs of Brassens and Brel the auteurs compositeurs interpretes who epitomised what is now widely regarded as the golden era of chanson française during the 1950s and 60s Tinker s discussion reveals the tensions in the narrators relationship with themselves other individuals and society The book builds upon and moves beyond the two dominant critical approaches used to write about French song the exclusively biographical oriented approach and the purely linguistic analysis Tinker focuses both on identity viewed primarily as a relational process and on representation linguistic musical vocal and gestural *Sounds French* Jonathyne Briggs,2015 *Sounds French* reveals how French society mediated the challenges of globalization through the consumption and production of popular music itself increasingly an expression of globalized culture As recorded music became more commonplace and crossed national boundaries in the second half of the twentieth century French musicians and their audiences articulated new types of communal identities around popular music genres that reflected the impact of social political economic and cultural transformations after the 1950s **Singing Poets**

Dimitris Papanikolaou, Dēmētrēs Papanikolaou,2007 This book shows how the model of singing poets becomes then an organizing principle for a system of national popular music It responds to the growing call for the teaching of the textual networks of popular music within the domains of literary and cultural studies Scott Walker and the Song of the One-All-Along Scott Wilson,2019-10-03 *Scott Walker and the Song of the One All Alone* offers in detailed interpretative commentaries of his best songs a sustained assessment of the work and career of Scott Walker one of the most significant and perplexing artists of the late 20th and 21st century For Brian Eno Walker was not only a great composer and a

superlative lyricist but also a significant contemporary poet Marc Almond goes further an absolute musical genius existential and intellectual and a star right from the days of The Walker Brothers As Almond suggests Walker s work is marked by a continual engagement with existentialist philosophy informing his approach to art politics and life In particular the device of the solitary figure or one all alone evoked in his songs provides the basis for his lyrical exploration of the singularity of existence in all its darkness as well as light Through following his own path Walker arrived at a unique sound according to his own method that produced a genuinely new form of song Looking closely at these songs this book also considers the wider political implications of his approach in its rejection of external authorities and common or consensual ideals

Les fronti eres improbables de la chanson Jean-Charles Herbin, Stéphane Hirschi, Centre d'analyse du message litt raire et artistique, 2001

The Mediating of Chanson Adeline Cordier, 2008 Jacques Brel Georges Brassens and L o Ferr are three emblematic figures of post war French song who have been seen by critics journalists and the public as the epitome of chanson and more generally of Frenchness The starting point of this study is the observation that the legacy of the systematic association of Brel Brassens and Ferr crystallised in Cristiani s 1969 interview and in Jean Pierre Leloir s photograph of the interview has enjoyed a prosperity which seems disproportionate to the actual relevance of the comparison between the three artists In 1969 the three singers were significant figures of French song but they were not the only ones Bringing them together was therefore a promise of media success but it was in no way expected to start a legend and yet the myth of the interview has today taken over its reality to the extent that the Com die Fran aise is presently almost thirty years later turning it into a play which was staged in May 2008 The photograph of the three singers smoking and drinking around a table is today and for a vast majority of people the only thing that they know about the famous interview if not about the singers The lack of obvious grounds to

justify the exclusivity of the trio suggests that there is more to it than a musical trinity. By taking into consideration the oral dimension of song, the socio-cultural context in which the trio emerged, and the mediation of their celebrity, this study aims to identify the factors of cultural and national identity that have held together the myth of the trio since its creation. Besides shedding new light on the significance of the three artists individually, this study proposes to demonstrate that each singer embodies qualities with which the French people likes to be associated, and that the trio Brel Brassens Ferr can therefore be seen as an arbitrary sketch of a certain Frenchness. In particular, this thesis focuses on the trio illustrating the popular representation of a key issue of French national identity: the paradoxical aspiration to both revolution and the status quo. By taking the cultural icon Brel Brassens Ferr as a case study through which to address questions of popular and national identity, this study contributes to cultural studies in two different ways. Firstly, through theorising the implications of the oral dimension of songs, it demonstrates the necessity of taking into consideration factors such as performance, the media, and the socio-historical context when studying artists as societal phenomena. Secondly, it evidences the importance of the study of forms of popular culture, such as iconic singers or music, when investigating the ways in which a society perceives its own national identity.
