Children At Risk:

Handbook of Children's Risk, Vulnerability and Quality of Life Habib Tiliouine, Denise Benatuil, Maggie K. W. Lau, 2022-07-30 This handbook makes a major contribution to the growing international research and policy interest in children's experienced well being or quality of life in childhood linking it to ongoing research on children's risk and vulnerability The editors and contributors adopt the broader concept of risk in addition to vulnerability Not much work considers the connections between risks that children experience and their quality of life In examining children's quality of life the chapters discuss various issues of risk and vulnerability that may affect their lives and also how the quality of childhood might be enhanced and maintained even in the face of these factors The chapters discuss experiences of violence and abuse access to basic services such as housing health and education and children's vulnerability due to broader external factors such as war conflict and environmental events The volume also includes the impacts of new technologies on children and the consequent risks and vulnerabilities they may face alongside the benefits This important volume brings together a diverse range of perspectives from established experts and emerging scholars in these fields of work It covers a wide range of geographical and cultural contexts and includes theoretical empirical policy and practice based contributions This handbook is a natural first point of reference for academics and policy professionals interested in quality of life well being and children's rights

Our Children at Risk Lawrie Mott, 1997

Children at Risk Janice Shaw Crouse, 2011-12-31 The desire for our children to be free from want and danger and to be able to enjoy their youth in innocence would seem to be universal Conventional wisdom says that parents in every socio economic level of society share the dream of preserving their children's innocence All want to provide a childhood and adolescence that shelters and protects children from the harshness of life and nurtures them until they are able to withstand the onslaught of reality One need only look at troubled areas of the world such as Northern Ireland parts of the Middle East or any number of other points on the globe to see how weak is any communion forged out of these universal desires for the welfare of children Even in the United States the competition of ideas and values about what represents the good society in which to raise our children is fierce as are differing views about the value of innocence and even life itself These differing ideas and values affect people's actions even when they have never reflected on them or have never cared enough to formulate those values into a coherent worldview Crouse contends that without morals children are at risk Moral boundaries not moral relativism provide a safe haven for children by preserving their innocence and protecting them from predators and pedophiles When authentic religious faith has been quashed children are no longer safe When the underlying values are wrong when there are no common values unifying a people even the best programs and most honorable of intentions are doomed to failure Well intentioned programs and policies inevitably fail miserably without an undergirding moral foundation as is documented by an abundance of data and the social trends in America today

Children, Risk and Safety on the Internet Livingstone, Sonia, Haddon, Leslie, 2012-07-18 As internet

use is extending to younger children there is an increasing need for research focus on the risks young users are experiencing as well as the opportunities and how they should cope With expert contributions from diverse disciplines and a uniquely cross national breadth this timely book examines the prospect of enhanced opportunities for learning creativity and communication set against the fear of cyberbullying pornography and invaded privacy by both strangers and peers Based on an impressive in depth survey of 25 000 children carried out by the EU Kids Online network it offers wholly new findings that extend previous research and counter both the optimistic and the pessimistic hype It argues that in the main children are gaining the digital skills coping strategies and social support they need to navigate this fast changing terrain But it also identifies the struggles they encounter pinpointing those for whom harm can follow from risky online encounters Each chapter presents new findings and analyses to inform both researchers and students in the social sciences and policy makers in government industry or child welfare who are working to enhance children s digital experiences

Children at Risk? Helen Roberts, Susan Smith, Carol Bryce, 1995 More years of productive life are lost to accidents than to heart disease and cancer combined More children and young people die from accidental injury than any other cause Little attention has been paid to the problem of child accidents or to the challenge of accident prevention Children at Risk fills this gap using survey data and detailed interviews with parents and guardians to explore the causes consequences and policy implications of child accidents in Britain Children at Risk focuses on key debates in accident research Are accidents caused by environmental hazards or by risky behaviour Should differences in risk be explained with reference to class or culture Should strategies for accident prevention be based on professional opinion or local knowledge By considering these questions the authors accumulate sufficient evidence to make a range of practical suggestions on how parents professionals and policymakers might best keep children safe Children at Risk combines a comprehensive literature review with rigorous empirical research It will be of great interest to students in social policy public health and medical sociology to health professionals and to other welfare practitioners and policymakers

Children at Risk James C. Dobson, 1994

Children at Risk Robert T. Ammerman, Michel Hersen, 2013-03-09 During the past decade a dramatic increase in research and clinical interest has risen in child abuse and neglect This recent growth in awareness is due at least partly to the alarming statistics documenting the incidence of child maltreatment Almost one million children are reported to be abused and neglected each year and many experts believe that this figure underestimates the true incidence Indeed recent surveys suggest that almost 1.5 million children are the targets of domestic violence every year A significant proportion of these children die as a function of this maltreatment whereas the remainder suffer a variety of short and long term deleterious medical and psychosocial consequences Child maltreatment is a universal problem that has precipitated a mobilization of effort from a variety of disciplines including psychology medicine psychiatry social work sociology and criminology Particular attention has been directed toward the prevention and treatment of child abuse and neglect Such endeavors require the screening of large groups in order to

identify families that are at high risk for engaging in such behavior Delineating those characteristics that differentiate high from low risk families and children is one of the obvious priorities for researchers and clinicians in the future This book therefore carefully considers the status of research on risk factors of abuse and neglect in children Adduced data undoubtedly will have practical value for subsequent intervention efforts Children, Risk and Safety on the Internet Sonia M.

Livingstone,Leslie Haddon,Anke Gorzig,2012 Based on an impressive in depth survey of 25 000 children carried out by the EU Kids Online network this timely book examines the prospect for young internet users of enhanced opportunities for learning creativity and communication set against the fear of cyberbullying pornography and invaded privacy **Children**
