徐琴 Xueqin Li,2000 Anthony Hardy s Sze Yuan Tang Collection of ancient Chinese had its inspirational beginnings in the early 1950s when as a schoolboy in England he was struck by the architectonic beauty of a solitary Shang jue tripod wine vessel in his father s collection of predominantly Western medieval art There is little doubt that his early encounter with the archaic jue led to an intense interest in early Chinese art and in ancient Chinese ritual bronzes in particular Hardy started collecting bronzes seriously in the early 1980s and places great importance on what he calls the Four P s Patination Pictogram Precision and Provenance To Hardy a bronze vessel worthy of collecting must have a good natural Patination nature s contribution to a great work of bronze art a Pictogram or inscription of historic significance Precision and sharpness of casting and also Provenance recording the academic history of the piece the collections it has been in where it has been exhibited and what has been written about it When Hardy married Susan Chen they decided that the exhibition of Hardy s principally Shang ritual bronzes scheduled for late 2000 at the Asian Civilisations Museum in Singapore should be expanded to include sculptural animal bronzes and the more feminine and jewel like inlaid bronzes of the Spring and Autumn and Warring States periods belonging to Chen s own collection Together the two collections offer a more extensive view of the glorious traditions of ancient Chinese bronzes

Chinese Bronzes* Robert W. Bagley,2008 Max Loehr 1903 1988 the most distinguished historian of Chinese art of his
generation is celebrated above all for a 1953 art historical study of Chinese bronzes that effectively predicted discoveries
Chinese archaeologists were about to make Those discoveries in turn overthrew the theories of Loehr s great rival Bernhard
Karlgrén 1889 1978 a Swedish sinologue whose apparently scientific use of classification and statistics had long dominated
Western studies of the bronzes Revisiting a controversy that was ended by archaeology before the issues at stake were fully
understood Robert Bagley shows its methodological implications to be profound Starting with a close reading of the work of
Karlgrén he uses an analogy with biological taxonomy to clarify questions of method and to distinguish between science and
the appearance of science Then turning to Loehr he provides the rationale for an art history that is concerned above all with
constructing a meaningful history of creative events one that sees the intentionality of designers and patrons as the driving
force behind stylistic change In a concluding chapter he analyzes the concept of style arguing that many classic confusions in
art historical theorizing arise from a failure to recognize that style is not a property of objects Addressed not just to ancient
China specialists or historians of Chinese art this book uses Loehr s work on bronzes as a case study for exploring central
issues of art history It will be of interest to anyone concerned with the analysis of visual materials *Eternal Offerings* Liu
Yang,2022-12-06 The collection of ancient Chinese bronzes at the Minneapolis Institute of Art is exceptional in its depth and
rarity It is generally considered to be one of the most important in the United States The works span millennia from the
Shang through the Han dynasties 1600 BCE to 220 CE illustrating the evolving function of ritual bronzes in Chinese society
This luxuriously illustrated catalog with essays contributed by renowned scholars and hundreds of thorough entries is the
first major study of the collection since the 1950s The book features over one thousand rich full color illustrations ink
rubblings and line drawings to showcase the elaborate motifs and unique details of these pieces and related works in order to
facilitate a deeper understanding of the artistry of the collection Dating production and provenance are reconsidered in
relation to the large scale archeological finds of recent decades and through an analysis of the inscriptions In addition to
correcting narrow aesthetic interpretations by situating the objects in their original cultural context many entries include
technical studies using methods such as X rays and CT scans to give fresh insights into the casting technology that was used

to produce these vessels By discussing the ritual political and technical aspects of ritual bronzes this fresh analysis provides a unique window into ancient Chinese culture Students of history and archaeology with an interest in early civilizations will find this book to be one of the most up to date and wide ranging studies of archaic Chinese bronzes now in print An
