Structural Systems for Tall Buildings I. D. Bennetts, 1995 If you're an engineer or architect, you can't afford to be without this unique database of structural systems used in the design of some of the most important tall buildings erected to date. *Structural Systems for Tall Buildings* reviews all major types of structural systems including lateral load resisting systems, gravity load resisting systems and systems for the future. The book explains how each is typically used for a given design problem and discusses the pros and cons for each major type. Masters Theses in the Pure and Applied Sciences Wade H. Shafer, 2012-12-06 *Masters Theses in the Pure and Applied Sciences* was first conceived, published and disseminated by the Center for Information and Numerical Data Analysis and Synthesis (CINDAS) at Purdue University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity were transferred to University Microfilms Xerox of Ann Arbor, Michigan, with the thought that such an arrangement

would be more beneficial to the academic and general scientific and technical community After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volumes were handled by an international publishing house to assure improved service and broader dissemination Hence starting with Volume 18 Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York and in the same year the coverage was broadened to include Canadian universities All back issues can also be ordered from Plenum We have reported in Volume 28 thesis year 1 983 a total of 10 661 theses titles from 26 Canadian and 197 United States universities We are sure that this broader base for these titles reported will greatly enhance the value of this important annual reference work While Volume 28 reports theses submitted in 1983 on occasion certain universities do report theses submitted in previous years but not reported at the time
