Kozyrev, 2022-02-24 This book constitutes revised selected papers from the 24th International Conference on Distributed and Computer and Communication Networks DCCN 2021 held in Moscow Russia in September 2021 Due to the COVID 19 pandemic the conference was held online The 31 full papers along with the 4 short papers were carefully reviewed and selected from 151 submissions The papers are organized in the following topical sections computer and communication networks analytical modeling of distributed systems and distributed systems applications *Design Principles for the Immune System and Other Distributed Autonomous Systems* Lee A. Segel, Irun R. Cohen, 2001-06-14 *Design Principles for the Immune System and Other Distributed Autonomous Systems* is the first book to examine the inner workings of such a variety of distributed autonomous systems from insect colonies to high level computer programs to the immune system It offers insight into the fascinating world of these systems that emerge from the interactions of seemingly autonomous components and brings us up to date on the state of research in these areas Using the immune system and certain aspects of its functions as a primary model this book examines many of the most interesting and troubling questions posed by complex systems How do systems choose the right set of agents to perform appropriate actions with appropriate intensities at appropriate times How in the immune system ant colonies and metabolic networks does the diffusion and binding of a large variety of chemicals to their receptors permit coordination of system action What advantages drive the various systems to complexity and by what mechanisms do the systems cope with the tendency toward unwieldiness and randomness of large complex systems
