## **Divine Command Ethics:**

*Divine Command Ethics* Michael J. Harris, 2004-03-01 The central aim of this book is to attempt to determine the response of the classic texts of Jewish traditions to the famous dilemma posed in Plato's Euthyphro: Does God freely determine morality or is morality independent of God? The author argues that the picture that emerges from Jewish texts is significantly more complex and nuanced than most of the contemporary Jewish philosophical literature is prepared to concede. While providing an extensive discussion of the perspective of Jewish tradition on divine command ethics, this book develops a position that is distinct from and critical of other views that have recently been advanced in Jewish scholarship. At the same time, the book provides a substantial analysis of some Christian perspectives on divine command ethics. Relevant biblical, rabbinic, and later Jewish texts are discussed, as well as some of the relevant views that have been taken in philosophical literature and in Christian and Jewish thought.

**Divine Commands and Morality** Paul Helm, 1981 This collection of twelve papers covers the question of the relation between morality and religion. The contributors include William Frankena, Philip Quinn, Robert Merrihew Adams, Richard Swinburne, James Rachels, Nelson Pike, Peter Geach, Robert Young, Baruch Brody, and others.

**An Essay on Divine Command Ethics** Jeremy Alan Evans, 2010 Twentieth-century analytic philosophy ushered in a renewed interest in an ethical theory known as the Divine Command Theory of ethics (DC). Consequent to the work of G. E. Moore, philosophers have been involved in metaethics or how we may ground ethical terms such as "good" and "right". The traditional DC response is to argue that God is the source of good and best serves that role in that He is an "ideal observer" of all states of affairs. The question is how is God's will relevant to determining the moral status of actions? At this point, one may distinguish between what God wills and what God in fact commands. However, the contemporary debate is to determine whether it is God's commands or God's will that is primary in determining moral obligation. The most vivid portrait of this distinction is found in the binding of Isaac. There, we note that God commands Abraham to sacrifice Isaac, but it is not at all clear that God wills the actual death of Isaac. Thus, in this work, I will present and defend a coherent DC view of ethics whereby our moral obligations are derived from the commands of God. In chapter II, I will provide a brief history of philosophers who have endorsed DC. In chapter III, I will argue that the best ground for objective moral values is best defined by DC. Chapter IV will be devoted to my particular argument for DC. I will take up the task of defending the traditional command view of DC. Chapters V and VI will be devoted to developing plausible responses to major objections to DC. In chapter V, I will attempt a resolution of the famous Euthyphro dilemma, and in chapter VI, I will argue that endorsing a DC view of ethics in no way negates the autonomy of the moral agent.

**Divine Command Morality** Paul Rooney, 1996 This work is a philosophical defence of the tenability of divine command theory as an acceptable Christian account of morality. The theory states that morality is founded upon God's commands. It has been associated particularly with Duns Scotus and William of Ockham. What God commands, man has a moral duty to do; what He forbids, man ought to avoid, and

man's duties arise only because God commands or forbids certain things. There are various ways of understanding what constitutes a divine command and this work focuses on the claim that revealed scriptural commands are the foundation of morality. **Divine Commands and Moral Requirements** Philip L. Quinn, Philip Lawrence Quinn, 1978. In this wide-ranging study Quinn argues that human moral autonomy is compatible with unqualified obedience to divine commands. He formulates several versions of the crucial assumptions of divine command ethics, defending them against a battery of objections often expressed in the philosophical literature. **Divine Command Morality**, 1979. An anthology that provides new translations and makes available much of the relevant historical literature needed for an exploration of the view that morality is very literally created by God. Contains 41 selections representing discussions of divine command morality in Ancient philosophy, scholastic philosophical theology, the Reformation tradition, the British modern period, and contemporary analytic philosophy. This book includes a bibliography of Latin, French, English, German, and Italian sources on divine command morality.

*Questions on an Ethics of Divine Commands* Andreas, 1997. In an anthology of historical and contemporary readings Idziak has collected important historical materials from the late medieval and early modern periods that give a good picture of the debate over divine command ethics. Philip L. Quinn, University of Notre Dame. **Nature and Command** J. Caleb Clanton, Kraig Martin, 2023-08-18. Since at least the time of Plato, religious explanations of the metaphysical foundations of morality have typically fallen into one of two camps: natural law theory, according to which morality is fundamentally explained by facts about human nature; facts that God is responsible for; and divine command theory, which holds that moral obligations arise directly from God's commands or some other prescriptive act of the divine will. J. Caleb Clanton and Kraig Martin offer an accessible analysis of these traditional views, reconstruct the various arguments for and against them, and offer an extended consideration of the historical emergence of the divide between these positions within the Christian tradition. *Nature and Command* goes on to develop and defend a theory that combines these two views: a metaethical approach that has not yet received the scholarly attention it deserves. Along the way, the authors make use of underexplored theological resources drawn from the Stone-Campbell movement, a nineteenth-century restoration movement that culminated in one of the largest Protestant groups in America by the dawn of the twentieth century. *Nature and Command* summons the resources of this particular Christian heritage; its first principles call for unity and ecumenism to solve one of the great dilemmas of moral philosophy and theology dating back to Plato's *Euthyphro*. This historically aware, argumentatively rigorous, and highly readable volume will serve as a valuable resource for moral philosophy and ethics, as well as for mining the Stone-Campbell Restoration tradition for historical and theological insights. **God's Command** John E. Hare, 2015-10-29. This work focuses on divine command and, in particular, the theory that what makes something obligatory is that God commands it, and what makes something wrong is that God commands us not to do it. Focusing on the Abrahamic faiths, eminent scholar John E. Hare explains that two experiences have had to be integrated. The first is that God tells us to do

something or not to do something The second is that we have to work out ourselves what to do and what not to do The difficulty has come in establishing the proper relation between them In Christian reflection on this two main traditions have emerged divine command theory and natural law theory Hare successfully defends a version of divine command theory but also shows that there is considerable overlap with some versions of natural law theory He engages with a number of Christian theologians particularly Karl Barth and extends into a discussion of divine command within Judaism and Islam The work concludes by examining recent work in evolutionary psychology and argues that thinking of our moral obligations as produced by divine command offers us some help in seeing how a moral conscience could develop in a way that is evolutionarily stable
