

# Dividing Power as a Solution

By dividing power among branches and levels of government, the Constitution prevents the concentration of power in one group. Multiple interests will guard against the danger of any one interest being strong enough to dominate society.

Divided Power in Ancient Greece Alberto Esu,2024-02-28 How did the division of power work in Ancient Greece This groundbreaking study reveals Ancient Greek political decision making to be a multi layered system of delegation and legal control Scholars have previously examined the nature and locus of sovereignty in the Classical and Hellenistic Greek poleis through institutional rhetorical or ideological approaches By concentrating on the institutional design of decree making Alberto Esu moves beyond unitary and hierarchical understandings of sovereignty he presents a new view of power as divided and horizontally organized between different decision making institutions each one with its own discourse and expertise Greek political decision making is thus seen through a new institutionalist perspective that rediscovers the normative importance of political institutions as factors shaping the collective behaviour of decision makers Part I explores how deliberative power in decree making was delegated in Classical Athens Mytilene and Hellenistic Megalopolis Part II examines procedures of legal control and judicial review in the Classical and Hellenistic periods Divided power proves to be a feature of both democratic and non democratic societies across the Ancient Greek world Esu s analysis of its institutional manifestation transforms our understanding of political life its discourses and norms in the Ancient Greek city states

Crafting Peace Caroline A. Hartzell, Matthew Hoddie, 2007-06-21 The recent efforts to reach a settlement of the enduring and tragic conflict in Darfur demonstrate how important it is to understand what factors contribute most to

the success of such efforts In this book Caroline Hartzell and Matthew Hoddie review data from all negotiated civil war settlements between 1945 and 1999 in order to identify these factors What they find is that settlements are more likely to produce an enduring peace if they involve construction of a diversity of power sharing and power dividing arrangements between former adversaries The strongest negotiated settlements prove to be those in which former rivals agree to share or divide state power across its economic military political and territorial dimensions This finding is a significant addition to the existing literature which tends to focus more on the role that third parties play in mediating and enforcing agreements Beyond the quantitative analyses the authors include a chapter comparing contrasting cases of successful and unsuccessful settlements in the Philippines and Angola respectively
