Advanced Polyhedra:

Advanced Polyhedra 2 Gerald Jenkins, Magdalen Bear, 2004 This beautiful model to cut out and glue together has twelve sharp spikes emerging from pentagonal cups and forming ten pairs of parallel planes each in a different color None of these ten colors occurs more than once on any spike or cup When completed the polyhedron rests on a horizontal surface on just three spikes

Advanced Polyhedra 1 Gerald Jenkins, Magdalen Bear, 2004 This beautiful model to cut out and glue together has sixty spikes each with three faces making 180 faces in all It is colored in twenty different colors each of which defines a plane surface and which is represented by nine faces Looked at another way it has twelve clusters of five spikes showing the relationship with the dodecahedron

Advanced Polyhedra 3 Gerald Jenkins, Magdalen Bear, 2004 This beautiful model to cut out and glue together is the result of arranging five interpenetrating cubes in a highly symmetrical way Each cube is printed in its own color and so it is easy to see that exactly two cubes meet at every vertex and that there are twelve surfaces defining each face of each cube There is a strong internal frame and multiple divisions in the golden ratio to discover

On the Shoulders of Giants National Research Council, Mathematical Sciences Education Board, 1990-02-01 What mathematics should be learned by today's young people as well as tomorrow's workforce On the Shoulders of Giants is a vision of richness of mathematics expressed in essays on change dimension quantity shape and uncertainty each of which illustrate

fundamental strands for school mathematics These essays expand on the idea of mathematics as the language and science of patterns allowing us to realize the importance of providing hands on experience and the development of a curriculum that will enable students to apply their knowledge to diverse numerical problems

Space Structures 4 G. A. R. Parke, C. M. Howard, Mr. C. M. Howard, 1993 The diversity of constructions included in this publication on space structures ranges from anten reflectors and masts positioned in space to equally exciting terrestrial structures notably large span domes barrel vaults multi layered grids cable and membrane systems and pneumatic structures This collection of more than two hundred

and twenty papers presented in two volumes is the work of leading international experts for presentation at the Fourth International Conference on Space Structures These two volumes contain a prodigious amount of original and innovative information on space structures that will be of especial interest to engineers architects and other professionals engaged in the planning design fabrication and erection of novel constructions
