Current Developments In European Integration Vol 18:

Theorising the European Union as an International Security Provider Annemarie Peen Dodt, Richard Whitman, Stefan Wolff, 2018-02-02 The European Union has increasingly taken on a role as international security provider that extends beyond the geographical scope of its membership This is clear from the wide range of military and civilian crisis management missions that the Union has undertaken but also identifiable through its other policies such as the European Neighbourhood Policy and development assistance which have also to some extent become security focused Yet the role of the EU as an international security provider remains under theorized and weakly understood The proposed book analyses the Union's role as an international security provider in a comprehensive way developing theoretical as well as empirical grounding for the understanding of the making and implementation of EU security policy The contributions in this book cover actors involved in the policy making process the dynamics of this process itself its outcomes strategies and policies and their impact on the ground They examine the relevance of and apply existing theories of international relations international security and foreign policy analysis to the specific case of the EU investigate empirically how particular policies are formulated and implemented and study the impact and effectiveness of the Union as an international security provider in a variety of cases compared This book was previously published as a special issue of *Global Society* *The Bush Administration (1989-1993) and the Development of a European Security Identity* Sophie Vanhoonacker, 2017-11-22 This title was first published in 2001 This compelling study draws insightful conclusions about US foreign policy towards Europe at a critical juncture in the post Cold War period An absorbing and illuminating account this material will be useful to non specialists and student readers of US foreign policy European integration and international relations alike *The EU, ASEAN and Interregionalism* L. Taken as a whole the chapters represent the range of research in African development and fully tie this development to the global political economy African nations play significant roles in world politics both as nations influenced by the ebbs and flows of the global economy and by the international political system but also as actors directly influencing politics and economics It is only through an understanding of both the history and present place of Africa in global affairs that we can begin to assess the way forward for future development

Two Tiers Or Two Speeds? James Sperling,1999 The sudden transformation of the Cold War security order in 1989 altered the structure of the European state system and necessitates the striking of a new balance between the economic political and military requirements of security This volume focuses on the most important institutions of European security the European Union and NATO Both institutions are expanding especially eastwards in terms of their respective roles and membership This double expansion raises many questions most crucially whether Europe will be a two speed security order which suggests openness inclusiveness and the emergence of an anarchical society or a two tiered security order which suggests a continued hierachical security system with all of its associated historical liabilities
