Collective Intelligence In Computer Based Collaboration:

Collective Intelligence in Computer-Based Collaboration John B. Smith, 1994-08-01 Proposing a new paradigm for Computer Supported Cooperative Work CSCW this ground breaking book presents a research agenda for developing and testing that paradigm It constitutes the first attempt to outline a comprehensive model of collaboration that integrates the cognitive conceptual and social dynamics of groups The challenge faced by all groups engaged in intellectual work is on the one hand to divide the task so that efforts of individual members may proceed in parallel and on the other hand to synthesize their separate contributions to form a coherent whole Addressing this challenge Smith examines the general form of a theory of computer based collaboration that extends across different tasks and working situations He uses the work of Newell Simon and Anderson as a base from which to consider a group as a form of distributed information processing system Within groups there are constructs analogous to human long term and short term memory conceptual processes and problem solving and knowledge construction strategies He discusses two metacognitive issues awareness and control as they occur in collaborative behavior And he reviews a number of advanced computer systems that support collaboration focusing on their impact on the thinking and behavior of groups Smith s theoretical framework combines elements of Information Processing System theory and its detailed process models of cognitive behavior with the situated perspective of activity theory The book suggests new and useful ways of conceiving problems and solutions to all those interested in the ways in which people interact with each other and with computers to achieve goals

Handbook of Collective Intelligence Thomas W. Malone, Michael Bernstein, 2022-06-07 Experts describe the latest research in a rapidly growing multidisciplinary field the study of groups of individuals acting collectively in ways that seem intelligent Intelligence does not arise only in individual brains it also arises in groups of individuals This is collective intelligence groups of individuals acting collectively in ways that seem intelligent In recent years a new kind of collective intelligence has emerged interconnected groups of people and computers collectively doing intelligent things Today these groups are engaged in tasks that range from writing software to predicting the results of presidential elections This volume reports on the latest research in the study of collective intelligence laying out a shared set of research challenges from a variety of disciplinary and methodological perspectives Taken together these essays by leading researchers from such fields as computer science biology economics and psychology lay the foundation for a new multidisciplinary field Each essay describes the work on collective intelligence in a particular discipline for example economics and the study of markets biology and research on emergent behavior in ant colonies human computer interaction and artificial intelligence and cognitive psychology and the wisdom of crowds effect Other areas in social science covered include social psychology organizational theory law and communications Contributors Eytan Adar Ishani Aggarwal Yochai Benkler Michael S Bernstein Jeffrey P Bigham Jonathan Bragg Deborah M Gordon Benjamin Mako Hill Christopher H Lin Andrew W Lo Thomas W Malone Mausam Brent Miller Aaron Shaw Mark Steyvers Daniel S Weld Anita

Resistance Advocacy as News Benjamin Rex LaPoe II, Victoria L. LaPoe, 2018-01-30 Resistance Advocacy as News Digital Black Press Covers the Tea Party examines the Black and mainstream press s digital interpretations of the Tea Party during President Barack Obama s first term The Tea Party narrative and the white ideologies disseminated by conservative groups was and continues to be an intricate story for journalists to tell This book tracks coverage of the Tea Party from the modern group s beginning in early February of 2009 until two weeks after the 2012 general presidential election in November While many mainstream journalists either fail to recognize or ignore all together the racial component that the Tea Party poses to Black solidarity this book shows that Black reporters working for the Black press absolutely recognize the racial component and provide more thorough discussions than their mainstream counterparts Historically the Black press has existed to fill holes of misrepresentation in the mainstream press to that end this book addresses questions surrounding the ongoing necessity of the Black press and whether our society is postracial combining a quantitative analysis of implicit racial frames with a qualitative analysis of resonant myth and providing empirical evidence that Black people still struggle to have their voices heard in the mainstream press

Computational Collective Intelligence Tadeusz M. Szuba, 2001-03-07 Introducing a groundbreaking approach to understanding measuring and applying Collective Intelligence Does Collective Intelligence CI exist and if so how can it be characterized quantified and harnessed Questions such as these continue to be hotly debated within both the scientific and philosophical communities Yet few researchers working in the fields of artificial intelligence or distributed computing doubt CI s enormous potential value to the future of computing Unfortunately for lack of a rigorous formal theory of Collective Intelligence most attempts to analyze CI systems have been disappointing at best In Computational Collective Intelligence Professor Tadeusz Szuba does much to rectify that situation by developing for the first time both a formal definition of CI and practical guidelines for its assessment and applications Working from the ground up Dr Szuba begins with a stimulating and insightful discussion of the types of intelligence including individual artificial and collective into which he brings ideas from AI information theory and distributed computing as well as psychology sociology animal behavior cognitive science and other relevant disciplines He tackles the problem of computational models for simulating and measuring CI He explores all theoretically feasible models of CI computations and presents a groundbreaking nondeterministic approach using the Random PROLOG Processor RPP as a CI modeling and evaluation tool He then introduces the Collective Intelligence Quotient IQS and develops clear cut guidelines for measuring it In the final chapters he lays the foundation for a dynamic new discipline Collective Intelligence Engineering CIE and considers its potential applications as an organizational restructuring

tool **Nature-Inspired Networking** Phan Cong-Vinh,2018-02-13 Nature inspired includes roughly speaking bio inspired physical inspired social inspired and so on This book contains highly original contributions about how nature is going to shape networking systems of the future Hence it focuses on rigorous approaches and cutting edge solutions which encompass three classes of major methods 1 Those that take inspiration from nature for the development of novel problem solving techniques 2 Those that are based on the use of networks to synthesize natural phenomena and 3 Those that employ natural materials to compute or communicate Superminds Thomas W. Malone,2018-05-15 From the founding director of the MIT Center for Collective Intelligence comes a fascinating look at the remarkable capacity for intelligence exhibited by groups of people and computers working together If you re like most people you probably believe that humans are the most intelligent animals on our planet But there s another kind of entity that can be far smarter groups of people In this groundbreaking book Thomas Malone the founding director of the MIT Center for Collective Intelligence shows how groups of people working together in superminds like hierarchies markets democracies and communities have been responsible for almost all human achievements in business government science and beyond And these collectively intelligent human groups are about to get much smarter Using dozens of striking examples and case studies Malone shows how computers can help create more intelligent superminds simply by connecting humans to one another in a variety of rich new ways And although it will probably happen more gradually than many people expect artificially intelligent computers will amplify the power of these superminds by doing increasingly complex kinds of thinking Together these changes will have far reaching implications for everything from the way we buy groceries and plan business strategies to how we respond to climate change and even for democracy itself By understanding how these collectively intelligent groups work we can learn how to harness their genius to achieve our human goals Drawing on cutting edge science and insights from a remarkable range of disciplines Superminds articulates a bold and utterly fascinating picture of the future that will change the ways you work and live both with other people and with computers **The Global Leader: Management Insights from Around the World** Terence Brake,1997 In 1994 Terence Brake co authored the book doing Business Internationally which provided comprehensive guidelines for individuals and organizations working across cultural borders The Global Leader is a follow up to this successful book and focuses on the urgent need for companies to build cultures that develop global leaders at all levels Filled with input executives and senior managers from leading global companies like Avon Bechtel Colgate Palmolive Huges Electronics and International Flavors and Fragrances this guide provides the reader with valuable insights into Organizational capabilities needed to build and sustain global competitiveness A leadership process that transforms the challenges of global competition into world class performance culture building tools that release leadership potential throughout the organization A change process for managing deep cultural transformation Parallel and Distributed Processing ,1999 **The Human Dimension of Computer-mediated Communications** Douglass James Scott,1997 *Transactions on Computational*

CCCC Bibliography of Composition and Rhetoric 1994 Gail E. Hawisher, Cynthia L. Selfe, 1996-09 This volume lists and annotates more than two thousand articles books dissertations and papers that with few exceptions appeared in 1994 It includes an index of authors and editors a subject index and entries cross referenced according to subject matter The 1994 Bibliography looks dramatically different from the Bibliography Erika Lindemann founded more than ten years ago Many more titles now relate to fields not represented in early editions Although composition and rhetoric has always borrowed methods of investigation from other disciplines areas such as critical theory science studies feminist theory technology studies and postmodern theory were much less a part of the discipline a decade ago These fields are well represented this year This volume like the 1993 Bibliography also differs from early editions in that it contains a section on electronic discussion groups or listservs including information on how readers may join the various groups Yet the mission and goals of the Bibliography remain the same to ensure that it is sufficiently comprehensive that it can continue to function as a major bibliographical resource available to scholars and teachers in rhetoric composition communication and literary education As usual the CCCC Bibliography of Composition and Rhetoric draws on a large group of experts in the field Annotations which accompany every entry in this volume describe a publication s contents and are intended to help users determine the entry s usefulness Annotations are brief and are meant to be descriptive not evaluative they explain what an entry is about but leave readers free to judge for themselves the work s merits The CCCC Bibliography of Composition and Rhetoric remains a critical bibliographical resource one that reflects and respects the variety of scholarship in composition studies and that exerts a constructive productive influence on the composition and rhetoric community
