Greenhouse Gas Control Technologies B. Eliasson, P. Riemer, A. Wokaun, 1999-05-20 These proceedings contain 270 papers outlining ideas and contributions to the new scientific technical and political discipline of Greenhouse Gas GHG Control The contributions were presented at the 4th International Conference on Greenhouse Gas Control Technologies GHGT 4 It was the largest gathering of experts active in this new and fast developing field GHGT 4 was different from its predecessors in that it included all greenhouse gases not only CO₂ and all issues which could contribute to the mitigation of the greenhouse problem technical economic and political The main focus was on practical solutions and real demonstrations of mitigation technology being planned and implemented today It also addressed ways to increase the efficiency of power production and utilisation and looked at proposals to encourage the development of renewable energy sources During the

Opening Session 10 keynote addresses were heard from prominent personalities in government industry and academia To tackle this very inter disciplinary problem and to achieve acceptable solutions it is essential for industry and government to initiate intense dialogue and cooperation Conferences like this can provide the opportunity for a meeting of minds between engineers and politicians in the face of global challenge The primary attributes of this global challenge are manifold the problem is global and international it is inter disciplinary both in substance and approach it covers technical political and economic issues and involves government science industry and academia it is complex and non linear and it will take the efforts of all parties involved to solve the problem These proceedings contain ideas for starting demonstration projects and for making better use of the power and flexibility of market measures They also show it is a problem we can influence and that there is a wealth of ideas The challenge now is to find the right partners to put these ideas into action

Controlled Release Veterinary Drug Delivery Michael J. Rathbone, R. Gurny, 2000-07-20 Many controlled release veterinary drug delivery systems CRVDDS are presently in use and recently there has been a host of new CRVDDS within veterinary medicine The challenges of this area of drug delivery arise from the unique anatomy and physiology of the target animal the cost constraints associated with the value of the animal being treated and the extended periods of time that delivery must be sustained for often measured in months The purpose of this book is to introduce the reader to the unique opportunities and challenges of the field of CRVDDS and to explain and discuss the basic controlled release principles underlying the development of CRVDDS Its aim is to provide an overview of many of the areas where CRVDDS have application and to highlight the opportunities and prospects for controlled release technology in the veterinary field Controlled Release Veterinary Drug Delivery comprises chapters that provide workers in the field and those interested in this area with information on the design development and assessment of a variety of CRVDDS The book contains chapters that describe the relevant animal physiological and anatomical considerations alongside descriptions of current and emerging controlled release delivery systems for a variety of routes for drug delivery and present overviews on the physical and chemical assessment of veterinary controlled release delivery systems The veterinary area is abound with opportunities for the development of controlled release drug delivery technologies It is an area of medicine that is open to the acceptance of novel drug delivery devices and which readily encompasses the use of novel routes of administration It is an area of many unmet needs most of which offer opportunities and unique challenges for the innovative formulation scientist to provide solutions This book will provide an insight into the biological clinical and pharmaceutical challenges that face the formulation scientist in this interesting and diverse area of research
