

What Is Scriptwriting? A Complete Guide To The Art & Craft

1. Scriptwriting Definition

A script is a blueprint for the production of media. It can be used for anything from short films; to TV series, to theater productions.

They include everything from dialogue, sound effects or background music cues, camera angles, and movement directions as well as blocking instructions for actors on stage.

2. Spec Script vs. Shooting Script

The term "Spec Script" is an industry term for a screenplay written on speculation. It's not commissioned by anyone and therefore the writer has no guarantee that it will ever be produced.

A shooting script, on the other hand, is a screenwriting document used to communicate with the cast and crew during the production of a film or television show.

3. Why Script Format

Script format is a way to write scripts for movies, TV, or theater. It's also the best way to write for blogging and other creative writing. Why?

Scripts are easier to read than traditional paragraphs because they have a left margin indented at 5 spaces (the industry standard) which means people can read faster with more ease.
