Constructing Programs From Specifications:

Constructing Programs from Specifications Bernhard Möller, 1991 This book contains papers and discussion transcripts giving a good survey of the state of the art in deriving programs from their specifications by algebraic means As opposed to the various refinement calculi for procedural programs the setting here is mostly that of functional or to cope with nondeterminacy relational languages First approaches to the classification of specifications allow the systematic solution of very general classes of problems Also the analysis of the structure of developments is shown in several examples Impressive work is presented in the area of automating standard derivation tasks both concerning semi automatic construction of efficient data type implementations and automatic transformation of functional specifications into efficient code Further papers address automatic program synthesis rapid prototyping and transformational derivation of parallel algorithms

Mathematics of Program Construction Bernhard Möller, 1995-07-10 This volume constitutes the proceedings of the Third International Conference on the Mathematics of Program Construction held at Kloster Irsee Germany in July 1995 Besides five invited lectures by distinguished researchers there are presented 19 full revised papers selected from a total of 58 submissions The general theme is the use of crisp clear mathematics in the discovery and design of algorithms and in the development of corresponding software and hardware among the topics addressed are program transformation program analysis program verification as well as convincing case studies
