## Complete Intersections:

**Weighted Complete Intersections** Victor V. Przyjalkowski, Constantin Shramov, 2026-02-02 This book discusses geometric properties of smooth weighted intersections in the context of mirror symmetry It includes a series of open problems in algebraic geometry and mirror symmetry and a series of examples methods and applications The book will appeal to graduate students and researchers in algebraic geometry

**Isolated Singular Points on Complete Intersections** Eduard Looijenga, 1984-03 This book will be of use to professional mathematicians working in algebraic geometry complex analytical geometry and to some extent differential analysis

Minimal Free Resolutions over Complete Intersections David Eisenbud, Irena Peeva, 2016-03-08 This book introduces a theory of higher matrix factorizations for regular sequences and uses it to describe the minimal free resolutions of high syzygy modules over complete intersections Such resolutions have attracted attention ever since the elegant construction of the minimal free resolution of the residue field by Tate in 1957 The theory extends the theory of matrix factorizations of a non zero divisor initiated by Eisenbud in 1980 which yields a description of the eventual structure of minimal free resolutions over a hypersurface ring Matrix factorizations have had many other uses in a wide range of mathematical fields from singularity theory to mathematical physics

**Complete Intersections** S. Greco, R. Strano, 2006-12-08 Projective Modules and Complete Intersections Satya Mandal, 1997-10-10 In these notes on Projective Modules and Complete Intersections an account on the recent developments in research on this subject is presented The author's preference for the technique of Patching isotopic isomorphisms due to Quillen formalized by Plumsted over the techniques of elementary matrices is evident here The treatment of Basic Element theory here incorporates Plumstead's idea of the generalized dimension functions These notes are highly self-contained and should be accessible to any graduate student in commutative algebra or algebraic geometry They include fully self contained presentations of the theorems of Ferrand Szpiro Cowsik Nori and the techniques of Lindel

Complete Intersections on an Algebraic Variety James Michael Hornell, 1967 Higher Multiplicities and Almost Free Divisors and Complete Intersections James Damon, 1996 Almost free divisors and complete intersections form a general class of nonisolated hypersurface and complete intersection singularities They also include discriminants of mappings bifurcation sets and certain types of arrangements of hyperplanes such as Coxeter arrangements and generic arrangements Associated to the singularities of this class is a singular Milnor fibration which has the same homotopy properties as the Milnor fibration for isolated singularities This memoir deduces topological properties of singularities in a number of situations including complements of hyperplane arrangements various nonisolated complete intersections nonlinear arrangements of hypersurfaces functions on discriminants singularities defined by compositions of functions and bifurcation sets

Algebraic Geometry Joe Harris, JOE AUTOR HARRIS, 1992-09-17 This textbook is an introduction to algebraic geometry that emphasizes the classical roots of the subject avoiding the technical details better treated with the most recent methods It provides a

basis for understanding the developments of the last half century which have put the subject on a radically new footing Based on lectures given at Brown and Harvard the book retains an informal style and stresses examples Annotation copyright by Book News Inc Portland OR

**Generalized Local Complete Intersections** Eugene H. Gover,1970

**Rational Normal Curves on Complete Intersections** Xuanyu Pan,2014 We prove that the moduli space of rational normal curves on a low degree complete intersection passing several suitable points is a complete intersection

**A Celebration of Algebraic Geometry** Brendan Hassett,James McKernan,Jason Starr,Ravi Vakil,2013-09-11 This volume resulted from the conference A Celebration of Algebraic Geometry which was held at Harvard University from August 25 28 2011 in honor of Joe Harris 60th birthday Harris is famous around the world for his lively textbooks and enthusiastic teaching as well as for his seminal research contributions The articles are written in this spirit clear original engaging enlivened by examples and accessible to young mathematicians The articles in this volume focus on the moduli space of curves and more general varieties commutative algebra invariant theory enumerative geometry both classical and modern rationally connected and Fano varieties Hodge theory and abelian varieties and Calabi Yau and hyperkähler manifolds Taken together they present a comprehensive view of the long frontier of current knowledge in algebraic geometry Titles in this series are co published with the Clay Mathematics Institute Cambridge MA

Computer Algebra and Polynomials Jaime Gutierrez,Josef Schicho,Martin Weimann,2015-01-20 Algebra and number theory have always been counted among the most beautiful mathematical areas with deep proofs and elegant results However for a long time they were not considered that important in view of the lack of real life applications This has dramatically changed nowadays we find applications of algebra and number theory frequently in our daily life This book focuses on the theory and algorithms for polynomials over various coefficient domains such as a finite field or ring The operations on polynomials in the focus are factorization composition and decomposition basis computation for modules etc Algorithms for such operations on polynomials have always been a central interest in computer algebra as it combines formal the variables and algebraic or numeric the coefficients aspects The papers presented were selected from the Workshop on Computer Algebra and Polynomials which was held in Linz at the Johann Radon Institute for Computational and Applied Mathematics RICAM during November 25 29 2013 at the occasion of the Special Semester on Applications of Algebra and Number Theory

The Monodromy Groups of Isolated Singularities of Complete Intersections Wolfgang Ebeling,2006-11-15

Deformations of Algebraic Schemes Edoardo Sernesi,2007-04-20 In one sense deformation theory is as old as algebraic geometry itself this is because all algebro geometric objects can be deformed by suitably varying the coefficients of their defining equations and this has of course always been known by the classical geometers Nevertheless a correct understanding of what deforming means leads into the technically most difficult parts of our discipline It is fair to say that such technical obstacles have had a vast impact on the crisis of the classical language and on the development of the modern one based on the theory of schemes and on cohomological methods The

modern point of view originates from the seminal work of Kodaira and Spencer on small deformations of complex analytic manifolds and from its formalization and translation into the language of schemes given by Grothendieck I will not recount the history of the subject here since good surveys already exist e.g. [27, 138, 145, 168]. Today while this area is rapidly developing a self-contained text covering the basic results of what we can call classical deformation theory seems to be missing. Moreover a number of technicalities and well-known facts are scattered in a vast literature as folklore sometimes with proofs available only in the complex analytic category. This book is an attempt to fill such a gap at least partially.

**Explicit Birational Geometry of 3-folds** Alessio Corti, Miles Reid, 2000-07-27 This volume first published in 2000 is an integrated suite of papers centred around applications of Mori theory to birational geometry.

**Deformation Theory** Robin Hartshorne, 2009-12-10 The basic problem of deformation theory in algebraic geometry involves watching a small deformation of one member of a family of objects such as varieties or subschemes in a fixed space or vector bundles on a fixed scheme. In this new book Robin Hartshorne studies first what happens over small infinitesimal deformations and then gradually builds up to more global situations using methods pioneered by Kodaira and Spencer in the complex analytic case and adapted and expanded in algebraic geometry by Grothendieck. The author includes numerous exercises as well as important examples illustrating various aspects of the theory. This text is based on a graduate course taught by the author at the University of California Berkeley.

**Vanishing of Ext and Tor Over Complete Intersections** Olgur Celikbas, 2010 *Proceedings of the International Conference on Algebra Dedicated to the Memory of A. I. Mal'cev*

Leonid A. Bokut', A. I. Kostrikin, 1992

**Birationally Rigid Fano Threefold Hypersurfaces** Ivan Cheltsov, Jihun Park, 2017-02-20 The authors prove that every quasi-smooth weighted Fano threefold hypersurface in the 95 families of Fletcher and Reid is birationally rigid.

**Transactions of the American Mathematical Society** American Mathematical Society, 1921 Monthly journal devoted entirely to research in pure and applied mathematics and in general includes longer papers than those in the Proceedings of the American Mathematical Society.
