**SPSS Demystified** Ronald D. Yockey, 2023-03-10 Without question statistics is one of the most challenging courses for students in the social and behavioral sciences Enrolling in their first statistics course students are often apprehensive or extremely anxious toward the subject matter And while IBM SPSS is one of the more easy to use statistical software programs available for anxious students who realize they not only have to learn statistics but also new software the task can seem insurmountable Keenly aware of students anxiety with statistics and the fact that this anxiety can affect performance Ronald D Yockey has written SPSS Demystified A Simple Guide and Reference now in its fourth edition Through a comprehensive step by step approach this text is consistently and specifically designed to both alleviate anxiety toward the subject matter and build a successful experience analyzing data in SPSS Topics covered in the text are appropriate for most introductory and intermediate statistics and research methods courses Key features of the text Step by step instruction and screenshots Designed to be hands on with the user performing the analyses alongside the text on their computer as they read through each chapter Call out boxes provided highlighting important information as appropriate SPSS output explained with written results provided using the popular widely recognized APA format End of chapter exercises included allowing for additional practice SPSS data sets available on the publisher s website New to the Fourth Edition Fully updated to SPSS 28 Updated screenshots in full color to reflect changes in the SPSS software system version 28 Exercises updated with up to date examples Exact p values provided consistent with APA recommendations [Data Analysis and Interpretation in the Behavioral Sciences \(with Info Trac\) + SPSS Local Version for Bundles - Version 15](#) Eugene Zechmeister, Emil Posavac, SPSS, 2006-12-01

**Categorical Data Analysis for the Behavioral and Social Sciences** Razia Azen, Cindy M. Walker, 2011-01-07 Featuring a practical approach with numerous examples this book focuses on helping the reader develop a conceptual rather than technical understanding of categorical methods making it a much more accessible text than others on the market The authors cover common categorical analyses and emphasize specific research questions that can be addressed by each analytic procedure so that readers are able to address the research questions they wish to answer To achieve this goal the authors Review the theoretical implications and assumptions underlying each of the procedures Present each concept in general terms and illustrate each with a practical example Demonstrate the analyses using SPSS and SAS and show the interpretation of the results provided by these programs A Look Ahead section at the beginning of each chapter provides an overview of the material covered so that the reader knows what to expect This is followed by one or more research questions that can be addressed using the procedure s covered in the chapter A theoretical presentation of the material is provided and illustrated using realistic examples from the behavioral and social sciences To further enhance

accessibility the new procedures introduced in the book are explicitly related to analytic procedures covered in earlier statistics courses such as ANOVA and linear regression Throughout each chapter the authors use practical examples to demonstrate how to obtain and interpret statistical output in both SPSS and SAS Their emphasis on the relationship between the initial research question the use of the software to carry out the analysis and the interpretation of the output as it relates to the initial research question allows readers to easily apply the material to their own research The data sets for executing chapter examples using SAS Version 9 1 3 and or IBM SPSS Version 18 are available on a book specific web site These data sets and syntax allow readers to quickly run the programs and obtain the appropriate output The book also includes both conceptual and analytic end of chapter exercises to assist instructors and students in evaluating the understanding of the material covered in each chapter This book covers the most commonly used categorical data analysis procedures It is written for those without an extensive mathematical background and is ideal for graduate courses in categorical data analysis or cross classified data analysis taught in departments of psychology human development family studies sociology education and business Researchers in these disciplines interested in applying these procedures to their own research will appreciate this book s accessible approach
