technology startups are now taking root everywhere from Delhi to Detroit to Nairobi to Sao Paulo Yet despite this globalization of startup activity our knowledge of how to build successful startups is still drawn primarily from Silicon Valley As venture capitalist Alexandre Lazarow shows in this insightful and instructive book this Silicon Valley gospel is due for a refresh and it comes from what he calls the frontier the growing constellation of startup ecosystems outside of the Valley and other major economic centers that now stretches across the globe The frontier is a truly different world where startups often must cope with political or economic instability and lack of infrastructure and where there might be little or no access to angel investors venture capitalists or experienced employee pools Under such conditions entrepreneurs must be creators who build industries rather than disruptors who change them because there are few existing businesses to disrupt The companies they create must be global from birth because local markets are too small They focus on resiliency and sustainability rather than unicorn style growth at any cost With rich and wide ranging stories of frontier innovators from around the world Out Innovate is the new playbook for innovation wherever it has the potential to happen *Journal of the Farmer's Club* Farmers' Club (London, England),1925 *The Farmer & Stock-breeder* ,1930 *The Bulletin* ,2005
