## **Border Lines:**

*Looking Beyond Borderlines* Lee Rodney, 2016-12-19 American territorial borders have undergone significant and unparalleled changes in the last decade They serve as a powerful and emotionally charged locus for American national identity that correlates with the historical idea of the frontier But the concept of the frontier so central to American identity throughout modern history has all but disappeared in contemporary representation while the border has served to uncomfortably fill the void left in the spatial imagination of American culture This book focuses on the shifting relationship between borders and frontiers in North America specifically the ways in which they have been imaged and imagined since their formation in the 19th century and how tropes of visuality are central to their production and meaning Rodney links ongoing discussions in political geography and visual culture in new ways to demonstrate how contemporary American borders exhibit security as a display strategy that is resisted and undermined through a variety of cultural practices

**Back Issues** Gary Genosko, 2019-06-12 Using independent critical and cultural theory journals that cross the Canada US border as key examples this book shows how to interpret the original practices of periodicals by tracing editorial diasporas and transitions to electronic publishing Back Issues explains the role of independent theory journals in the institutional formation of critical theory and cultural studies in Canada and the US by focusing on two seminal publications Paul Piccone's *Telos* and Arthur Kroker's *Canadian Journal of Political and Social Theory* Editorial transits across the international border figure largely as do founding conferences interpersonal flare ups and the conviviality of academic communities and pre-gentrified urban bohemia Both commensurable and incommensurable relationships between journal projects are analysed and a hitherto unwritten history of critical and cultural theory in Canada is broached *American Line Type Book, Borders, Ornaments* Daystrom, inc, 1906 *Borderlines*, 1987 **Border Lines** Andy Wainwright, 1995 **Bordering and**

**Ordering the Twenty-first Century** Gabriel Popescu, 2011-10-16 This timely book explores the central role that borders play in shaping the contemporary world Building on a discussion of border thinking and making from antiquity to the present Gabriel Popescu applies a critical eye to current border making concepts processes and contexts Throughout he offers a balanced understanding of borders explaining why and how interstate borders have emerged whose interest they serve who is involved in border making and how border making practices affect societies Assessing the latest theoretical approaches to border studies the author deftly incorporates a range of disciplinary perspectives including geography international relations sociology history security studies and anthropology Popescu explores recent world events discussing how current issues such as migration terrorism global warming pandemics the international human rights regime outsourcing the economic crisis supranational integration regionalization and digital technology relate to borders and influence our lives Written with a clear eye and voice this book makes a complex subject accessible to a wide readership **Living at the Borderlines** Cynthia Barrow-Giles, Don D. Marshall, 2003 The idea that the Caribbean could be devolving downward in wealth function and

sovereignty has become a recurrent theme in both academic and popular literature By focusing on some of the current issues facing Caribbean nation states the editors and contributors to this volume hope to inform and contribute to the ongoing debate on the broad themes of Sovereignty and Development and the prospects for survival of Caribbean nation states in a globalised world While some of the papers seek to describe and analyse the range and complexity of the challenge to national sovereignty and public policy autonomy others focus on issues relating to small country size gender and ethnic tensions security constitutional reform and regional integration The result is a balanced perspective the contributors do not gloss over the problem faced by the region At the same time they do not present a hyper pessimistic picture of Caribbean development prospects What gives the collection a particular dynamism is the way in which the authors have challenged the terrain of political possibilities traditionally defined for small peripheral societies

**Borderlines in a Globalized World** G. Preyer,Mathias Bös,2002-03-31 Scholars of different schools have extensively analyzed world systems as networks of communication under the fashionable heading globalization Our collected new research pushes the argument one step further Globalization is not a homogenization of all social life on earth It is a heterogeneous process that connects the global and the local on different levels To understand these contemporary developments this book employs innovative concepts strategies of research and explanations Globalization is a metaphor for different borderstructures new borderlines and conditions of membership which emerge in a global world system As a world system expands it incorporates new territories and new peoples The process of incorporation creates frontiers or boundaries of the world system These frontiers or boundary zones are the locus of resistance to incorporation ethnogenesis ethnic transformation and ethnocide
