

- Steps :
- 1. Define an Employee class and declare the given data members.
- 2. Get the employee details using the member function
- 3. calculate netsalary of given employee using formula
display the resultant value
- 4. write the main function and create Employee objects. Call member functions on the employee objects to read the data ,to calculate netsalary and to print the data members

Class:

- The **class** is a fundamental OOP concept in C++.
- A class declaration defines a new type that links code(functions/operations) and data.
- This new type is then used to declare objects of that class.
