CORE COMPONENTS OF DEEP LEARNING

Neural Networks

Neural networks are the core entities that power deep learning models. They are actually computational models made of interconnected nodes, similar to neurons of the brain.

Deep Neural Networks

Deep neural networks are neural networks that have multiple layers, which allow them to learn the more complex features and arrive at accurate predictions.

Activation Functions

Activation functions are responsible for deciding which information must be passed to the next layer. They introduce complexity & help the network learn from data.
