## Current Trends In Nonlinear Systems Co:

**Current Trends in Nonlinear Systems and Control** Laura Menini, Luca Zaccarian, Chaouki T. Abdallah, 2006-09-13  
This volume is an outgrowth of the workshop Applications of Advanced Control Theory to Robotics and Automation organized in honor of the 70th birthdays of Petar V Kokotovic and Salvatore Turi Nicosia Both Petar and Turi have carried out distinguished work in the control community and have long been recognized as mentors as well as experts and pioneers in the field of automatic control covering many topics in control theory and several different applications The variety of their research is reflected in this book which includes contributions ranging from mathematics to laboratory experiments The scope of the work is very broad and although each chapter is self contained the book has been organized into thematically related chapters which in some cases suggest to the reader a convenient reading sequence The great variety of topics covered and the almost tutorial writing style used by many of the authors will make this book suitable for both experts in the control field and young researchers who seek a more intuitive understanding of these relevant topics in the field
