Drunken Forest:

How Heavy Is the Mountain Tim Rundquist, 2000-09-20 *How Heavy Is The Mountain* begins in 1986 as a young college graduate Kris Westerberg arrives in Ketchikan Alaska for the first time As a fresh recruit to an Alaskan touring company he faces a summer of unknown adventure and along with two of his companions from the Outside gets to know southeast Alaska through his tour guiding excursions to sites of local color and the occasional fishing mishap Kris returns for another summer of touring in 1987 this time to Skagway Alaska launching site of the Klondike Gold Rush Here Kris and his friends take up residence in a retired Gold Rush era brothel and begin to dig deeply into the local experience not only through touring but also via Slow Bicycle Racing sauna expeditions in the Dyea bush Hot Red Onions and a backcountry trek over the historic Chilkoot Trail In the summer of 1988 Kris is assigned as a guide out of Fairbanks Alaska He is quickly accepted into the fraternity of long haul tour drivers as he begins to make the circuit among Fairbanks Dawson City Denali National Park and many other locales Then in the tiny hamlet of Tok Alaska he meets a very unlikely person Genna the woman of his dreams Their ensuing romance takes them from midnight gardening to a Summer Solstice party through a devastating forest fire and ultimately to a promise to spend an Alaskan winter together in a remote cabin near Skagway The winter of 1988 1989 tests Kris mettle in a wholly new way as he and Genna explore the vagaries of living among the elements together They manage to survive and even thrive despite indiscriminate icestorms unheated Volkswagens and frosty outdoor privies with their relationship and their sanity more or less intact And as the springtime finally dawns Kris begins to realize that rather than being just a tour guide he is becoming a true Alaskan in every sense *How Heavy Is The Mountain* is a palette of tones styles and themes At once it is erudite and offbeat informative and entertaining Within its pages a reader encounters narrative travel writing miniature wildlife treatises poetry pointless drinking songs and highly personalized storytelling Overall the story is told with warmth humor and an affection for its subjects in particular the great land that is Alaska

Global Warming 101 Bruce E. Johansen, 2008-06-30 The accelerating pace of global warming is provoking anxiety that the Earth is reaching an ominous threshold a point of no return Within a decade or two various feedbacks may take greenhouse warming past any human ability to contain or reverse it Carbon dioxide levels in the atmosphere are rising rapidly fed by increasing fossil fuel use world wide melting permafrost slash and burn agriculture in Indonesia and Brazil increasing wildfires as well as rapid industrialization using dirty coal in China and India Global warming may well become the most urgent problem the world faces during the 21st Century Natural variations are no longer the major contribution or forcing in Earth s climate Human contributions became the major factor about 1950 This book has been prepared as a reference for high school students but it also will be useful for anyone who wants a compact plain spoken basic guide to the science of global warming *Global Warming 101* begins with an examination of basic issues followed by important controversies in the field The book then describes scientific issues related to melting ice rising seas and effects on plants and animals as well as human health

Global Warming 101 concludes with consideration of possible solutions Global Warming 101 combines a survey of the science of global warming with reporting from around the world from sinking Pacific islands and thawing Arctic permafrost which indicate that significant global warming already has begun *Twilight* Eduard von Keyserling,1927 **Habitats**

DK,2023-10-24 Celebrates and explains the astonishing range of habitats on Earth and the intricate balance of their animal and plant communities This book is a beautiful visual reference to the world's natural habitats and the plants and animals that live there It explores global habitat types including desert Arctic tundra and tropical forest and distinctive regional habitats such as the windswept puna grasslands of the Andes or the dripping fern clad rainforests of New Zealand Packed with fascinating illustrations the book analyzes how each habitat works and examines its unique combination of plants and animals along with the features that suit them to live there It then goes deeper telling stories about how the inhabitants relate to one another and interact Stories are told using images and graphics showing what is going on in the natural ecosystem The stories include survival strategies and life cycles how pollinators fertilize plants and how animals distribute the seeds how similar species divide up food or living space to avoid competition and how some species cooperate in intimate partnerships Earth's pristine wildernesses are dwindling so the book includes national parks wildlife reserves and other protected areas and the conservation efforts needed to preserve our precious biological diversity **Thriller: Ghosts of**
