**Philosophy of Law as an Integral Part of Philosophy** Thomas Bustamante,Thiago Lopes Decat,2020-12-24 This edited collection considers the work of one of the most important legal philosophers of our time Professor Gerald J Postema It includes contributions from expert philosophers of law The chapters

dig deep into important camps of Postema's rich theoretical project including the value of the rule of law the ideal of integrity in adjudication his works on analogical reasoning the methodology of jurisprudence dialogues with Ronald Dworkin Joseph Raz Frederick Schauer and H.L.A. Hart The collection includes an original article by Professor Postema in which he develops his conception of the rule of law and replies to some objections to previous works and an interview in which he provides a fascinating and unique insight into his philosophy of law

**Children's Understanding** Graeme S. Halford, 2014-02-25 This work argues that cognitive development is experience driven and processes entailed in acquiring information about the world are analyzed based on recent models of learning and induction The way information is represented and accessed when performing cognitive tasks is considered paying particular attention to the implications of Parallel Distributed Processing PDP models for cognitive development The first half of the book contains analyses of human reasoning processes drawing on PDP models of analogy development of strategies and task complexity all based on aspects of PDP representations It is proposed that PDP representations become more differentiated with age so more vectors can be processed in parallel with the result that structures of greater complexity can be processed This model gives an account of previously unexplained difficulties in children's reasoning including some which were influential in stage theories The second half of the book examines processes entailed in some representative cognitive developmental tasks including transitive inference deductive inference categorical syllogisms hypothesis testing learning set acquisition acquisition and transfer of relational structures humor hierarchical classification and inclusion understanding of quantity arithmetic word problems algebra conservation mechanics and the concept of mind Process accounts of tasks are emphasized based on applications of recent developments in cognitive science
