Basic Processes in Reading David LaBerge, S. Jay Samuels, 2017-03-27 Originally published in 1977 this volume contains the most recent theoretical views and experimental findings by prominent psychologists at the time working in areas they considered to be most basic to the reading processes The material will still be of value to people interested in applied and basic aspects of reading as well as those concerned with language processing and information processing in general The volume divides conveniently into two areas perception and comprehension The initial chapters deal with the perceptual processes involved in reading The second half of the volume delves into the area of comprehension The interested reader will find a wide variety of topics covered in the volume that reflect the amazingly wide range of cognitive functions that are part of the reading process

**Literacy Beyond Text Comprehension** M. Anne Britt, Jean-François Rouet, Amanda Durik, 2017-07-06 Literacy Beyond Text Comprehension aims to systematically investigate how readers interpret reading tasks within a situation and how that interpretation influences reading behavior and comprehension Presenting a new model of REading as problem SOLVing RESOLV the authors describe reading comprehension in terms of how a reader adopts goals within a particular situation that then guide what is read when and how By applying the RESOLV model to a range of reading situations this book provides evidence to suggest that there is no unitary understanding of a task because individuals bring their own goals and characteristics to the situation as such it demonstrates the importance of understanding how a reader e.g student test taker employee completing a work task

represents the context and the specific assignment Written by internationally recognized learning sciences scholars Literacy Beyond Text Comprehension advances the state of the art in reading research but also seeks to inform a broader range of audiences including those interested in the teaching and the assessment of reading
