Early Intervention With Multirisk Families An Integrative Approach:

Early Intervention with Multi-risk Families Sarah Landy, Rosanne Menna, 2006 This book focuses on the treatment of families at psychosocial risk outlining an integrative approach to early intervention and providing both a theoretical and a very practical approach to intervention with the most at risk families

Emotional Development and Families Julie Hakim-Larson, 2017-09-30 This lively and engaging book conducts a thorough review of the current research literature in developmental psychology and socialisation and then clearly links theory to practical applications in both clinical and everyday situations Life's first important lessons on how to handle emotions often emerge early on within family relationships forming the foundation for emotional development over the life span Couples siblings parents and extended family members all have profound influences on each other's emotional lives as well as on the lives of the children they are socialising Students can expect to learn a wide range of relevant topics bringing together theory practice and research in a comprehensive and lucid way Covering the main topics of emotional development this textbook reviews contemporary research and makes recommendations for how students might practically use the findings in their future studies or in practice Filled with a wealth of resources and suggestions for further reading this book is an ideal supplementary text suitable for students taking undergraduate and postgraduate courses on developmental psychology family psychology and child clinical psychology This book may also be helpful for those taking undergraduate and postgraduate courses on social work counselling education studies and family studies

Supporting Difficult Transitions Mariane Hedegaard, Anne Edwards, 2019-07-11 The international contributors to Supporting Difficult Transitions discuss examples of transitions that are problematic for children young people and their carers Focusing on vulnerable children and young people the transitions include starting school changing schools starting work entering a new culture or a culture that has been changed to focusing on vulnerable children and young people The book will be useful to practitioners involved in supporting children and their carers as they make these moves students and course tutors in the caring professions researchers and policy makers and those who implement policy for children and young people The different case examples are given coherence by drawing on cultural historical approaches to how people move between practices Particular attention is paid to how practitioners can build shared understandings of what matters for children and young people and for the institutions they are entering These understandings become a resource to strengthen collaborations between practitioners or between practitioners and the children and their carers as they support entry into new practices

Encyclopedia of Infant and Early Childhood Development Marshall M. Haith, Janette B. Benson, 2008-02-19 Infancy is a unique period in that at no other state is there greater growth and development During this time growth is occurring at a physical level but equally impressive are the socio emotional and cognitive developments during this time Genetics the womb environment and the physical environment after birth all combine to impact the rate and manner of growth Who we ultimately become as individuals begins here Intended for

Threats To Optimal Development Charles A. Nelson, 2013-06-17 Psychology s recent immersion in risk research has introduced a new variant in which the focus is not solely on disease but also on the effects and consequences produced by the multiple aspects of risk on individual adaptation Variations in such patterns of adaptation signal the entrance of protective factors as an added element to the clinical and research focus in the prediction of positive versus negative outcomes under the duress

of stressful experiences Given psychology's investment in the entire range of human adaptation embracing severe disorder at one extreme and strong positive adaptations at the other it is not surprising to find this new element of compensatory protective factors as a reshaping factor in the field of risk research It is one that recognizes and studies the relevance of risk influences on disorder but also focuses on recovery from disorder or the absence of disorder despite the presence of risk This latter element implicates the notion of resilience It is this opening of the field of risk research that seems to bear the heavy and welcome imprint of psychology Fundamental to the study of protective factors in development however is a broad knowledge base focused on risk factors that often contain the healthy development of infants and children This volume reflects a continuation of the concerns of the Institute of Child Development with the nature and content of development in multiple contexts It comes at a most welcome point since the Institute in collaboration with the University of Minnesota's Department of Psychology now participates in a jointly shared graduate training program in clinical psychology which stimulates and supports the growth of a newly emergent developmental psychopathology For this field to advance will require a broad perspective and acceptance of the significance of the diversity of risk factors that extends throughout the life span and results in developmental trajectories that implicate various biological psychological and sociocultural risk elements
