Cognitive Approaches to English Mario Brdar, Marija Omazić, Višnja Pavičić Takač, 2009-12-14 The present volume contains a selection of papers presented at the conference Cognitive Approaches to English an international event organized to mark the 30th anniversary of English studies at the Faculty of Philosophy Josip Juraj Strossmayer University Osijek which was held in Osijek on October 18 19 2007 The participants were invited to discuss issues in cognitive accounts of English ranging from fundamental to methodological to interdisciplinary and applied The volume is accordingly divided into four parts Part I Motivation in grammar deals with various phenomena in the grammar of English in the broadest sense of the term all of which are shown to be motivated by metaphorical and or metonymic operations Part II Constructing meaning between grammar and lexicon contains five chapters dealing with phenomena ranging from various peculiarities of form meaning pairings such as synonymy polysemy and figurative meanings to concept formation The four chapters that make up Part III are concerned with the phenomenon of interlinguistic and intercultural variation in the use of metaphorical and metonymic processes The volume is concluded by Part IV the three papers of which attempt to reconsider some TEFL issues from a cognitive linguistic point of view

A Cognitive Approach to the Instruction of Phrasal Verbs Ghuzayyil Mohammed Al-Otaibi, 2020 English as a Foreign Language EFL learners find some phrasal verbs problematic because of their idiomatic and polysemous nature They are frequently used in spoken English and textbooks suggest an arbitrary way in teaching them Cognitive linguists proposed that the particle plays a major role in determining the meaning of such phrasal verbs This study investigated the effectiveness of a cognitive approach i e Rudzka Ostyn s Model in teaching taught and new phrasal verbs including metaphorical ones Using a list of frequent phrasal verbs a quasi experimental design was used in which an experimental group was required to create mind maps of the common meanings of each particle with example phrasal verbs The control group on the other hand was asked to memorize the frequent senses of the most frequent phrasal verbs along with their translations The experimental group did not outperform the control group on the post test This was attributed to a number of problems such as the fact that some senses given by some particles are not outlined in Rudzka Ostyn s Model Further the analytical procedure followed by students to cognitively understand phrasal verbs should be made explicit and address the interaction between the verb and the particle Additionally following a cognitive approach instructors should focus more on the particles up and out since they have many senses and contribute a lot to phrasal verb formation
