Alpha Centauri:

Alpha Centauri, the Nearest Star Isaac Asimov, 1976 Discusses the constellations and stars their distance luminosity and size stellar astronomy starlight and life on other planetary systems with special reference to the third brightest and also the nearest star Alpha Centauri

Alpha Centauri Martin Beech, 2014-10-15 As our closest stellar companion and composed of two Sun like stars and a third small dwarf star Alpha Centauri is an ideal testing ground of astrophysical models and has played a central role in the history and development of modern astronomy from the first guesses at stellar distances to understanding how our own star the Sun might have evolved It is also the host of the nearest known exoplanet an ultra hot Earth like planet recently discovered Just 4.4 light years away Alpha Centauri is also the most obvious target for humanity's first directed interstellar space probe Such a mission could reveal the small scale structure of a new planetary system and also represent the first step in what must surely be humanity's greatest future adventure exploration of the Milky Way Galaxy itself For all of its closeness Centauri continues to tantalize astronomers with many unresolved mysteries such as how did it form how many planets does it contain and where are they and how might we view its extensive panorama directly In this book we move from the study of individual stars to the study of our Solar System and our nearby galactic neighborhood On the way we will review the rapidly developing fields of exoplanet formation and detection

[Voyage to Alpha Centauri](#) Michael D. O'Brien, 2013-11-04 Set eighty years in the future this novel by the best selling author Michael O'Brien is about an expedition sent from the planet Earth to Alpha Centauri the star closest to our solar system The *Kosmos* a great ship that the central character Neil de Hoyos describes as a flying city is immense in size and capable of more than half light speed Hoyos is a Nobel Prize winning physicist who has played a major role in designing the ship Hoyos has signed on as a passenger because he desires to escape the seemingly benign totalitarian government that controls everything on his home planet He is a skeptical and quirky misanthropic humanist with old tragedies loves and hatreds that are secreted in his memory The surprises that await him on the voyage and its destination will shatter all of his assumptions and point him to a true new horizon Science fiction and fantasy literature are genres that have become dominant forces in contemporary worldwide culture Our fascination with the near angelic powers of new technology its benefits and dangers its potential for obsession and catastrophe raises vital questions that this work explores about human nature and the cosmos about man's image of himself and where he is going and why he seeks to go there

Alpha Centauri William Barton, Michael Capobianco, 1998 As the crew of the starship *Mother Night* embarks on a colonizing mission to relieve Earth of the ever growing population a terrorist plague is unleashed on the ship and as their journey ends an ancient relic awaits them one that can provide hope and redemption or cause the destruction of humankind Reprint
