Goodall,2017 This illustrated book covers the complete history of the United States Los Angeles class attack submarines from initial design and construction through testing and trials to its current operations The nuclear powered USS Los Angeles SSN 688 class attack submarine represented the lead ship of the largest group of vessels constructed for the US Navy during the Cold War and was purposefully designed for anti submarine operations against the Soviets Sixty two boats were built and launched between 1976 and 1996 and the class continues to serve in force to this day The exclusive and extensive photographic coverage of the boat s interior is featured here for the first time Details of the boats armament includes four 21 bow mounted torpedo tubes supporting the Mk 48 ADCAP torpedo series Tomahawk BGM 109 cruise missile and Harpoon UGM 84 anti ship missile capability The author s unprecedented access allows the reader a first time view of these submarines

US Nuclear Submarines Jim Christley,2012-01-20 A detailed examination of the controversial design and development of the US nuclear submarine exploring the engineering and safety issues that have dogged their deployment *Report on United States Nuclear-powered Attack Submarine Program* United States. Congress. House. Committee on Armed Services. Subcommittee on Seapower and Strategic and Critical Materials,1979 *U.S. Navy's Future Submarine Force Structure* United States. Congress. House. Snider,1993 **Soviet Cold War Attack Submarines** Edward Hampshire,2020-09-17 In this highly detailed book naval historian Edward Hampshire reveals the fascinating history of the nuclear powered attack submarines built and operated by the Soviet Union in the Cold War including each class of these formidable craft as they developed throughout the Cold War period The November class which were the Soviet Union s first nuclear submarines had originally been designed to fire a single enormous nuclear tipped torpedo but were eventually completed as boats firing standard torpedoes The Alfa class were perhaps the most remarkable submarines of the Cold War titanium hulled which was light and strong but extremely expensive and difficult to weld successfully crewed with only thirty men due to considerable automation and 30% faster than any US submarines they used a radical liquid lead bismuth alloy in the reactor plant The Victor class formed the backbone of the Soviet nuclear submarine fleet in the 1970s and 1980s as hunter killer submarines began to focus on tracking and potentially destroying NATO ballistic missile submarines The Sierra classes were further titanium hulled submarines and the single Mike class submarine was an experimental type containing a number of innovations Finally the Akula class were being constructed as the Cold War ended and these boats form the mainstay of the Russian nuclear attack submarine fleet today This book explores the design development and deployment of each of these classes in detail offering an unparalleled insight into the submarines which served the Soviet Union throughout the Cold War period The text is supported by stunning illustrations photographs and

Congress. Senate. Appropriations Committee,United States. Congress. Senate. Committee on Appropriations. Subcommittee on Dept. of Defense,1970 **Report on the Bottom-up Review** United States. Department of Defense,Les Aspin,1993 In March 1993 Secretary of Defense Aspin initiated a comprehensive review of the nation s defense strategy force structure modernization infrastructure and foundations He felt that a department wide review needed to be conducted from the bottom up because of the dramatic changes that have occurred in the world as a result of the end of the Cold War and the dissolution of the Soviet Union These changes in the international security environment have fundamentally altered America s security needs Thus the underlying premise of the Bottom Up Review was that we needed to reassess all of our defense concepts plans and programs from the ground up This final report on the Bottom Up Review provides the results of that unprecedented and collaborative effort It represents the product of hundreds of individuals labor and dedication It describes the extensive analysis that went into the review and the recommendations and decisions that emerged **Silent and Unseen** Alfred Scott McLaren,2015-05-15 Silent and Unseen is a memoir of a submariner s life on a U S attack submarine during the Cold War by Capt Alfred S McLaren an experienced submarine officer and nuclear attack submarine commander He describes in riveting detail the significant events that occurred early in the Cold War during his seven years 1958 65 on board three attack submarines the USS Greenfish SS 351 USS Seadragon SSN 584 and USS Skipjack SSN 585 He took part in the first submerged transit of the Northwest Passage a Baffin Bay expedition and as commander of USS Queenfish SSN 651 a North Pole expedition that completed the first survey of the entire Siberian Continental Shelf McLaren s stories and anecdotes offer a look at the development of attack boat tactics and under ice exploration techniques During the early high risk years of the Cold War submarines were continually at sea and each reconnaissance and intelligence collection mission was of potentially great value to the United States The missions often required zeroing in on the potential enemy to collect the intelligence desired generally within weapons range Unlike a war patrol the U S attack boat had to remain undetected and then withdraw as silently and unseen as it s original approach Greenfish was one of the most successful Pacific diesel submarines when McLaren served aboard her as a watch and weapons officer He then served as watch officer on the Seadragon when she became the first nuclear submarine to transit from the Atlantic to the Pacific via the Arctic Ocean En route she examined the underside of icebergs conducted the first underwater survey and passage through the Northwest Passage and surfaced at the North Pole McLaren concludes by recounting his experiences on board what was then the world s fastest and most advanced submarine USS Skipjack SSN 585 during the Cuban Missile Crisis two Cold War missions and the very intensive and exciting
