**and Applied Memory Research** Douglas J. Herrmann,Chris Hertzog,Cathy McEvoy,Paula Hertel,Marcia K. Johnson,2013-11-19 Basic researchers unlock the secrets of nature applied researchers unlock the means by which those secrets of nature can change people s lives Neither basic nor applied research has an independent impact These volumes examine the convergence of basic and applied research in the field of memory Volume 1 Theory and Context focuses on the methods for understanding and applying basic memory theory while Volume 2 Practical Applications expands the understanding of practical memory research by providing in depth research examples and findings If the science of memory is to make a significant contribution to society coordinating our basic and applied efforts and determining how they complement each other become of paramount importance These volumes will help in this regard both as textbooks demonstrating how to investigate memory and apply basic memory theory and as reference sources leading to a better understanding of certain problems in basic and applied memory research Readers of these volumes will gain a thorough grasp of the way major themes relate to basic and applied research collaboration how programmatic basic and applied research can be conducted on particular memory problems and the manner in which basic and applied work in major problem areas has been incorporated into the field of memory Both volumes present important information that will be indispensable to researchers and students alike

**Intersections in Basic and Applied Memory Research** David G. Payne,Frederick G. Conrad,2013-06-17 In recent years there has been increasing interaction between basic and applied memory researchers ranging from heated debates to highly productive collaborations This collection of papers based on presentations at the Third Practical Aspects of Memory conference reviews the progress as well as obstacles to progress in the ongoing collaboration between basic and applied memory researchers This volume represents the state of the art in memory research domains that straddle the basic applied divide The text is organized around three themes including theoretical and metatheoretical issues concerning the interaction of basic and applied memory research laboratory investigation of real world memory problems and solutions of everyday problems using theoretical concepts derived from basic memory research The first section illustrates why collaboration between basic and applied memory researchers should be beneficial and provides guidelines for avoiding some of the pitfalls The second and third sections present some of the most significant contemporary findings by researchers whose work is basic yet applicable or applied yet theoretically based Students and professional memory researchers will find the substantive results to be provocative and theoretically engaging making the information presented in this volume invaluable These examples of successful application will be of substantial pragmatic value and researchers are certain to be grappling with these issues for years to come

*Religion and Cultural Memory* Jan Assmann, Rodney Livingstone, 2006 In ten brilliant essays Jan Assmann explores the connections between religion culture and memory Building on Maurice Halbwachs's idea that memory like language is a social phenomenon as well as an individual one he argues that memory has a cultural dimension too He develops a persuasive view of the life of the past in such surface phenomena as codes religious rites and festivals and canonical texts on the one hand and in the Freudian psychodrama of repressing and resurrecting the past on the other Whereas the current fad for oral history inevitably focuses on the actual memories of the last century or so Assmann presents a commanding view of culture extending over five thousand years He focuses on cultural memory from the Egyptians Babylonians and the Osage Indians down to recent controversies about memorializing the Holocaust in Germany and the role of memory in the current disputes between Israelis and Palestinians in the Middle East and between Protestants and Catholics in Northern Ireland
