Evidence-Based Otolaryngology Jennifer Shin, Christopher Hartnick, Gregory Randolph, 2009-12-29 Recognizing the clinician's need for quick access to a comprehensive and immediately useful presentation of evidence-based material, the authors and editors have condensed the research on the most common otorhinolaryngological complaints into this indispensable volume. Their unique approach color-codes the level of research backing each set of evidence in order to make assessment of the evidence as quick and useful as possible. Each clinical problem is presented with a color key letting the physician know the level of evidence available: green, high-level evidence; yellow, low to moderate levels of evidence; or red, major disagreement or only minimal, low-level evidence. The content of each chapter is structured in the same manner so the reader quickly becomes accustomed to finding precisely the information needed for each new case. Featuring sections on general otolaryngology, head and neck surgery, pediatrics, and otology, *Evidence-Based Otolaryngology* not only presents the research but gives the clinician immediately applicable

Skolnick, Wayne M. Alves, 2017-11-13 Handbook of Neuroemergency Clinical Trials Second Edition focuses on the practice of clinical trials in acute neuroscience populations or what have been called neuroemergencies. Neuroemergencies are complex, life-threatening diseases and disorders, often with devastating consequences, including death or disability. The overall costs are staggering in terms of annual incidence and costs associated with treatment and survival, yet despite their significance as public health issues, there are few drugs and devices available for definitive treatment. The book focuses on novel therapies and the unique challenges their intended targets pose for the design and analysis of clinical trials. This volume provides neurologists, neuroscientists, and drug developers with a more complete understanding of the scientific and medical issues of relevance in designing and initiating clinical development plans for novel drugs intended for acute neuroscience populations. The editors provide the best understanding of the pitfalls associated with acute CNS drug development and the best information on how to approach and solve issues that have plagued drug development. Presents a comprehensive overview on clinical trials and drug development challenges in acute neuroscience populations. Provides neurologists, neuroscientists, and drug developers with a complete understanding of scientific and medical issues related to designing clinical trials. Edited by leaders in the field who have designed and managed over 50 neuroemergency clinical trials.      **Chess openings, ancient and modern, by E. Freeborough and C.E. Ranken** E. Freeborough, 1893      *Playing the Odds* Jay Carty, 1995-06 This readable, easy-to-understand book for non-Christians urges them to make an informed decision about life after death. Covers such topics as heaven, hell, fear of death, the need to choose Christ today.      Fixed: Cheating, Doping, Rape and Murder - The Inside Track on Australia's Racing Industry Matthew Bennis, 2012-11-01 Matthew Bennis takes us inside the murky world of Australia's racing industry. Dapper horse trainer Les Samba was in Melbourne for the annual yearling sales when he turned down an Italian meal with racing contacts, saying, "I have got to meet a bloke." Just hours later, he was laying dead in the middle of the road with blood pouring from five bullet wounds to his head and body. Racing in Australia has a dark and dangerous underbelly. Powerful people play for high stakes in an industry worth 14 billion a year. And they don't play nicely. Yearling sales are rigged, horses doped, races fixed, and taxes dodged by high-rolling punters. Every day, huge sums of money are made by bookies who don't want to put any of it back into the industry. Meanwhile, jockeys starve and sweat themselves to the point of delirium, many dying or suffering permanent injury while racing for as little as 130 a race. Young female jockeys are raped, often by the trainers they work for. This is the true story every racing fan needs to read. It goes past the glorious image of the Melbourne Cup winner holding his hand aloft.

to reveal what really goes on in the dark and murky corridors of Australian racing It tells you about the bent jockeys cheating trainers crooked owners and greedy bookies Everyone wants an angle in racing this book tells you just how often that means the race is Fixed
