*A Guide to English Grammar* Bessie Brooks, 2012-02-17 There is elements of language that allow us to better understand the world Abstractions in language help us classify ideas into groups so that we may generalize or specify parts within a label For instance a car is made up of many parts such as the engine the wheels the body etc We call it a car instead of of an engine driving the wheels with a body attached to carry passengers to make it easier for us not only to transfer the thought within our mind but also to others Also by calling it a car we have differentiated the object from a train or a bike both being other modes of transportation Abstractions are part of our mental grids that help us by chopping reality into fragments so that we may organize it and put it into our grasp of understanding Something such as the temperature cannot be measured because it is infinitely variable It is just our environment reduced to numbers so that we can conceive it in our minds Again our world is divided into pieces so the human mind can understand it bit by bit From seeing a car to measuring the temperature language offers an explanation to our experience and it is a powerful tool to help us think      An Official Guide
