Keßler, 2019-06-15 *Teachability and Learnability across Languages* addresses key issues in second foreign and heritage language acquisition as well as in language teaching. Focusing on a Processability Theory perspective, it brings together empirical studies of language acquisition, language teaching and language assessment. For the first time, a research timeline for the role of instruction in language learning is presented, showing how the field of second language acquisition (SLA) research has developed over the last four decades since

Pienemann's work on learnability and syllabus construction over the 1980s. The book includes studies of child and adult second as well as foreign language acquisition research covering a wide range of target languages including English, German, Hungarian, Japanese, Norwegian, Polish, Spanish, Swedish, and Turkish. In addition, future extensions of PT are discussed. This volume is designed for advanced students in international programs of SLA and Applied Linguistics as well as for SLA researchers and second and foreign language teachers.

Interdisciplinary Perspectives on Virtual Place-Based Learning Reneta D. Lansiquot, Sean P. MacDonald, 2019-12-12. This book explores how virtual place-based learning and research has been interpreted and incorporated into learning environments both within and across disciplinary perspectives. Contributing authors highlight the ways in which they have employed a variety of methodologies to engage students in the virtual exploration of place. In the process, they focus on the approaches they have used to bring the real world closer through virtual exploration. Chapters examine how the resources of the urban environment have been tapped to design student research projects within the context of an interdisciplinary course. In this way, authors highlight how virtual place-based learning has employed the tools of mapping and data visualization, information literacy, game design, digital storytelling, and the creation of non-fiction VR documentaries. This book makes a valuable contribution to the literature, offering a model of how the study of place can be employed in creative ways to enhance interdisciplinary learning.
