Advances in Computer Systems Architecture Amos Omondi, 2003-09-16 This book constitutes the refereed proceedings of the 8th Asia Pacific Computer Systems Architecture Conference ACSAC 2003 held in Aizu Wakamatsu Japan in September 2003. The 23 revised full papers presented together with 8 invited papers were carefully reviewed and selected from 30 submissions. The papers are organized in topical sections on processor architectures and innovative microarchitectures, parallel computer architectures and computation models, reconfigurable architectures, computer arithmetic, cache and memory architectures and interconnection networks and network interfaces.

Advances in Computer Architecture Glenford J. Myers, 1978 A completely updated edition of this overview of modern computer architecture. Examines alternatives to classical low level von Neumann computer architecture, discussing the problems of classical architecture and new solutions to these problems. Illustrates new concepts through in depth case studies of the Intel APX 432, IBM's SWARD and other machines. State of the art concepts covered include tagged storage, capability based addressing, process management, protection domains and error detection.

Advances in Computer Systems Architecture Thambipillai Srikanthan, Jingling Xue, Chip-Hong Chang, 2005-10-19 On behalf of the Program Committee we are pleased to present the proceedings of the 2005 Asia Pacific Computer Systems Architecture Conference ACSAC 2005 held in the beautiful and dynamic country of Singapore. This conference was the tenth in its series, one of the leading forums for sharing the emerging research findings in this field. In consultation with the ACSAC Steering Committee we selected a member Program Committee. This Program Committee represented a broad spectrum of research expertise to ensure a good balance of research areas, institutions and experience while maintaining the high quality of this conference series. This year's committee was of the same size as last year but had 19 new faces. We received a total of 173 submissions which is 14% more than last year. Each paper was assigned to at least three and in some cases four Program Committee members for review. Wherever necessary the committee members called upon the expertise of their colleagues to ensure the highest possible quality in the reviewing process. As a result we received 415 reviews from the Program Committee members and their 105 co-reviewers whose names are acknowledged in the proceedings. The conference committee adopted a systematic blind review process to provide a fair assessment of all submissions. In the end

we accepted 65 papers on a broad range of topics giving an acceptance rate of 37.5%. We are grateful to all the Program Committee members and the co-reviewers for their efforts in completing the reviews within a tight schedule. Advances in Computer Systems Architecture Pen-Chung Yew, Jingling Xue, 2004-08-19 On behalf of the program committee we were pleased to present this year's program for ACSAC Asia Pacific Computer Systems Architecture Conference. Now in its ninth year ACSAC continues to provide an excellent forum for researchers, educators, and practitioners to come to the Asia Pacific region to exchange ideas on the latest developments in computer systems architecture. This year the paper submission and review processes were semiautomated using the free version of CyberChair. We received 152 submissions, the largest number ever. Each paper was assigned at least three, mostly four, and in a few cases seven, committee members for review. All of the papers were reviewed in a 1-month period during which the program chairs regularly monitored the progress of the review process. When reviewers claimed inadequate expertise, additional reviewers were solicited. In the end we received a total of 594 reviews, 3.9 per paper, from committee members as well as 248 coreviewers whose names are acknowledged in the proceedings. We would like to thank all of them for their time and effort in providing us with such timely and high quality reviews, some of them on extremely short notice. Advances in Computer Systems Architecture Lynn Choi, Yunheung Paek, Sangyeun Cho, 2007-08-21 The refereed proceedings of the 12th Asia Pacific Computer Systems Architecture Conference are presented in this volume. Twenty-six full papers are presented together with two keynote and eight invited lectures. Collectively they represent some of the most important developments in computer systems architecture. The papers emphasize hardware and software techniques for state-of-the-art multi-core and multi-threaded architectures. **Advances in Computer Systems Architecture**, 2005 **Advanced Computer Architecture** Kain, Richard Y. Kain, 1994-12-01 Advanced Computer Architecture Richard Y. Kain, 1996 This book presents a coherent approach to computer system design that encompasses many, if not most, of the design problems and solutions options. Covers not only the basic tricks and techniques but also the relationships between software and hardware levels of system implementation and operation. **Advanced Computer Architecture and Parallel Processing** Hesham El-Rewini, Mostafa Abd-El-Barr, 2005-03-25 Computer architecture deals with the physical configuration, logical structure, formats, protocols, and operational sequences for processing data, controlling the configuration, and controlling the operations over a computer. It also encompasses word lengths, instruction codes, and the interrelationships among the main parts of a computer or group of computers. This two-volume set offers a comprehensive coverage of the field of computer organization and architecture. Advanced Computer Architectures Sajjan G.
