CIM. Computer Integrated Manufacturing August-Wilhelm Scheer, 2012-12-06 Computer Integrated Manufacturing
CIM is the computerized handling of integrated operational processes between production planning and control design process planning production and quality assurance The consistent application of information technology along with modern manufacturing techniques and new organizational procedures opens up great potential for rationalization by speeding up processes thereby reducing stocks and improving product structure and delivery times Following a comprehensive justification of the CIM integration principle this book discusses the current state of applications and new demands arising from the integration principle as applied to the individual CIM components The interfaces between business and technical information processing are considered in detail The main emphasis however is on strategies for realization and implementation based on concrete experience The Y CIM information management model developed and tested at the author's institute is presented as a procedural method for implementing CIM and demonstrated using up to date examples In addition to the procedure for developing a CIM strategy concrete sub projects are developed which are directed at specific sector or enterprise structures The survey of further CIM developments including design stage cost estimation use of expert systems and inter company process chains have proved to be effective CIM components since the first edition of this book and are now treated in the main text Six German and five American industrial implementations are presented to illustrate the diverse areas of emphasis in the implementation sequence and to indicate how CIM can be realized with currently available data processing tools *Cim*, 1991 CIM Computer Integrated Manufacturing August-Wilhelm Scheer, 2012-12-06
Modern information technology has opened up new possibilities of flexibilization and cost reduction in production The author defines CIM Computer Integrated Manufacturing as a concept for the structuring of industrial enterprises Manufacturing technologies demand a CIM concept which can be realized through the capabilities of information processing available today The idea of integrating different areas of CIM such as production planning and control PPC computer aided design CAD and computer aided manufacturing CAM is explained through operating chains and put into a CIM architecture based on a hierarchy of EDP systems The stance taken in this book of defining CIM as a total concept for industrial enterprises is increasingly gaining ground The book does not aim to put the functional details of the individual CIM components PPC CAD CAP and CAM in the foreground but rather to emphasize the integration principles for the functional demands of the individual components This book appeared in the Federal Republic of Germany in 1987 and within one year it had run to three editions The author contributes to this book not only his scientific knowledge but also his experience as a consultant for implementing CIM concepts **CIM Systems** Ferdinand Haverman Mitchell, 1991 Combining manufacturing systems with management techniques this integrated approach to designing and developing CIM systems provides a multi disciplinary system oriented background understanding of advanced manufacturing issues and strategies It also offers design methods

that can be used to create competitive manufacturing systems The text s methods include assessing problems determining solution approaches and developing and integrating systems based on relevant engineering science and management disciplines Software is included for a simple system environment simulation SES model that illustrates the application of key concepts Real world application design models are applied to specific system examples The author discusses design principles within a comprehensive framework providing a context for understanding manufacturing operations and relationships Throughout the text the integrated technical and management considerations aim to encourage effective CIM team management
