**Medical and Healthcare Textiles** Subhash C. Anand, J F Kennedy, M Miraftab, S. Rajendran, 2010-07-15 Medical textiles remain one of the most dynamic areas of research in textiles. Medical and healthcare textiles is the fourth in a series of conferences held at the University of Bolton. Like its predecessors it has attracted papers from some of the leading international centres of expertise in the field. Contributors cover a range of topics including emerging textile based biomaterials, hygienic textiles, the use of textiles in infection control and as barrier materials, bandaging and pressure garments for managing chronic infections such as ulcers, the role of textiles in the management of burns and wounds, textile based implantable devices such as tissue scaffolds and sutures and intelligent textiles. Provides a comprehensive overview of medical textiles from the risk of infection control and barrier materials through to directives, regulations and standards shaping the medical device industry. Explores developments in healthcare and hygiene products including odor and pH control as well as protective and disposable fabrics. Reviews development in the area of implantable materials featuring vascular grafts, knee implants and scaffolds.

**Interdisciplinary Assessment of Personal Health Monitoring** S. Schmidt, O. Rienhoff, 2013-07-17 Europe is facing a paradox while governments try to curb public spending the demands on our healthcare systems continue to rise. The use of smart technologies and innovation can help to address the challenges faced by healthcare systems today such as an ageing population, a shortage of healthcare professionals and restrictions on financial resources. But despite increasing evidence of the benefits technology can bring the healthcare sector has been slow to embrace the digital revolution and has stuck to more traditional methods and models. This book presents selected contributions to the symposium on Personal Health Monitoring (PHM) and Ethics and future areas of PHM which took place in advance of the 11th World Congress of Bioethics held in Rotterdam, the Netherlands in June 2012. Most of the papers present the outcomes of the European PHM Ethics project which conducted interdisciplinary analyses of emerging PHM applications. Additional invited contributions deal with important issues related to the project's primary objectives and outcomes. The project is strongly associated with the new eHealth Action Plan launched by the European Commission in December 2012 which is designed to bring the benefits of digital solutions into healthcare systems. The book covers a broad spectrum ranging from the technical setup of PHM systems to ethical issues raised by PHM applications and will be of interest to all those concerned with improving the provision of healthcare worldwide.
