Exploring Cognitive, Affective, Design Thinking, Artificial Intelligence, Cybernetics and E-Learning Dimensions in Contemporary Education, 2025-12-18 This volume offers a timely and forward looking examination of how emerging technologies teaching innovations and interdisciplinary theories are reshaping education globally It addresses the convergence of cognitive and emotional learning design thinking artificial intelligence and cybernetics across all levels of education from early childhood to higher education and initial teacher education ITE Through conceptual inquiry and applied research this volume provides insights into how educators and institutions can evolve to meet the changing demands of an increasingly digital and interconnected world *Modern Trends in Cybernetics and Systems: Proceedings of Sections 5 Communication, education and informatics, 6 Artificial intelligence and 7 Neuro- and bio-cybernetics*, 1977

AI and Cognitive Modelling for Education Boris Aberšek, Andrej Flogie, Igor Pesek, 2023-07-30 This book offers a groundbreaking approach to bridging the gap between various disciplines involved in cognitive modeling in education By drawing on the fields of learning neuro science cognitive science neurobiology and computer science it provides a new perspective on how we can integrate these disciplines with education to create more effective learning environments The main objective of this book is to delve into the ethical sociological and technological questions surrounding the introduction of intelligent and smart learning environments in education By analyzing these issues this book aims to bridge the gap between the various disciplines involved in cognitive

modeling and education while highlighting the benefits and risks associated with these advancements With the emergence of AI based tutors coaches and learning environments students now have access to a new type of self learning and self training that was previously unavailable Distance learning has become increasingly popular in recent years and the use of computer assisted learning tools has revolutionized the way we think about education The goal of education must be to instill in students a desire to learn for themselves and this can only be achieved through active self directed and reflective learning With intelligent tutoring systems students are empowered to take an active role in their own education rather than simply being passive recipients of information This book offers practical strategies for teachers to facilitate this transition enabling them to act as facilitators and guides rather than one way communicators By embracing this new approach to education we can help students become lifelong learners who are equipped with the skills they need to succeed in the 21st century As we cannot predict the future with certainty the true effects of education may only be revealed in the long run making it critical to understand the potential consequences of introducing these new learning tools By exploring these complex topics this book offers valuable insights for educators policymakers and anyone interested in the future of education

Research in Education ,1970 **Educational Evaluation, Assessment and Monitoring** Cees Glas,Jaap Scheerens,Sally M. Thomas,2006-01-16 This book looks at the foundations of school self evaluation from a scientific as from a practical perspective Planning concepts restructuring of education systems organizational theory on schools evaluation methodology and models of school effectiveness and school improvement are discussed as contributing to the overall conceptualization of school self evaluation A broad range of approaches is presented and methodological requirements are discussed School self evaluation contains controversial issues that reflect tension between the need for objectivity in a context that is permeated by values and potential conflicts of interests Similar tensions may be seen to exist with respect to the static and reductionist aspects of available data collection procedures in a complex and dynamic situation and the appeal for external accountability on the one hand and improvement oriented self reflection on the other The mission of the book is to clarify these tensions and offer ways to deal with them in practical applications The school effectiveness knowledge base is offered as a substantive educational frame of references that serves an important function in selecting relevant factors for data collection and the use of the evaluation results
