Groom, 1995      **Cycling to Work** Patrick Rérat, 2020-12-07

This book presents a thorough discussion of utility cycling cycling in the urban environment and everyday mobility It is based on large survey answered by 14 000 participants in the bike to work action in Switzerland and quantifies the various dimensions of utility cycling It proposes an innovative theoretical framework to analyse and understand the various dimensions of the uses of bikes and their diversity It addresses the factors that motivate commuters to get on their bike and highlights the barriers to this practice between deficient infrastructures and lack of legitimacy This research makes a diagnosis and discusses the way to develop this sustainable mode of transportation By combining quantitative results in the form of tables figures and maps and including qualitative results in the form of quotations from survey participants this book provides a thorough and enjoyable read It will be of interest to researchers policy makers advanced students in the field of urban planning social sciences and transportation

**Promoting walking and cycling** Pooley, Colin G, 2013-08-21 Why despite the supposed desirability of cycling and walking do so many people feel unable or unwilling to incorporate these modes of transport into their everyday journeys This problem one of the most pressing questions facing transport planners has major implications for environmental policy urban planning and existing social and economic structures Drawing on

original research the authors reveal the reasons behind our resistance and suggest evidence based policy solutions that could significantly increase levels of walking and cycling These informed perspectives will enlighten urban planners and policymakers as well as students and scholars of transport and mobility issues

**Pro Cycling on \$10 a Day** Phil Gaimon,2014-05-05 In his book *Pro Cycling on 10 a Day* Phil Gaimon brings the full powers of his wit to tell his story Plump grumpy slumped on the couch and going nowhere fast at age 16 Phil Gaimon began riding a bicycle with the grand ambition of shedding a few pounds before going off to college He soon fell into racing and discovered he was a natural riding his way into a pro contract after just one season despite utter ignorance of a century of cycling etiquette Presented here as a guide and a warning to aspiring racers who dream of joining the professional racing circus Phil s adventures in road rash serve as a hilarious and cautionary tale of frustrating team directors and broken promises Phil s education in the ways of the peloton his discouraging negotiations for a better contract his endless miles crisscrossing America in pursuit of race wins and his conviction that somewhere just around the corner lies the ticket to the big time fuel this tale of hope and ambition from one of cycling s best story tellers *Pro Cycling on 10 a Day* chronicles the racer s daily lot of blood soaked bandages sleazy motels cheap food and overflowing toilets But it also celebrates the true beauty of the sport and the worth of the journey proving in the end that even among the narrow ranks of world class professional cycling there will always be room for a hard working outsider

**Strategies for Sustainable Mobilities** Friederike Hülsmann,2016-04-01 Sustainable mobility is a qualitative vague and normative vision Although this vagueness is often criticized and seen as a drawback it also allows diverse stakeholders to commit to the goal of sustainable mobility It allows for consensus which can also help achieve a transport system that enables mobility for current and future generations The goal of sustainable mobility is an ambitious one and requires a long term and process oriented perspective With this in mind this volume examines sustainable mobilities from multiple angles varying by time region cultural and economic backgrounds local stakeholders and governance structures By achieving a better understanding of mobility behaviour and mobility needs in different contexts this book develops innovative strategies and advances modelling approaches which evaluate these strategies Presented here is not an ideal package of strategies to achieve sustainable mobility but rather innovations in the different disciplines and fields to show how each of them can contribute to keeping all people mobile today and in the future

Jordi Rello,Martin H. Kollef,Emilio Díaz,Alejandro Rodríguez,2010-05-28 Infections and their complications are a very important clinical area in the intensive care unit setting Community acquired infections and nosocomial infections both contribute to the high level of disease acquisition common among critically ill patients The accurate diagnosis of nosocomial infections and the provision of appropriate therapies including antimicrobial therapy effective against the identified agents of infection have been shown to be important determinants of patient outcome Critical care practitioners are in a unique

position in dealing with infectious diseases They are often the initial providers of care to seriously ill patients with infections Additionally they have a responsibility to ensure that nosocomial infections are prevented and that antimicrobial resistance is minimized by prudently employing antibiotic agents It is the editors hope that this book will provide clinicians practicing in the intensive care unit with a reference to help guide their care of infected patients To that end they have brought together a group of international authors to address important topics related to infectious diseases for the critical care practitioner
