Cipd Core:

Core Management for HR Students and Practitioners Peter Winfield, Ray Bishop, Keith Porter, 2007-06-01 This is the second edition of the successful text published in 2000. The text continues to include self-assessment exercises, exam questions, further reading, and research, and uses short case studies and articles to relate theory to practice. The new edition is completely up-to-date with more extracts from *Personnel Today* and linked in to a website provided by the authors. The book provides excellent coverage of the CIPD syllabus for three core areas of the CIPD syllabus: Managing People, Managing Activities, and Managing a business context. New end-of-chapter website links are included. *Learning and Development Practice in the Workplace* Kathy Beevers, Andrew Rea, David Hayden, 2019-11-03 *Learning and Development Practice in the Workplace* is the ideal textbook for anyone studying CIPD L D qualifications and apprenticeships at Level 3 or Level 5, as well as for practitioners new to an L D role. This book covers what is required of an L D professional and how to meet and exceed these expectations, how to align L D activity with organisational strategy, and crucially how to identify learning needs and design effective L D practice. This new edition of *Learning and Development Practice in the Workplace* has been fully updated, reflecting the new CIPD Profession Map and now has dedicated chapters on the different approaches to learning delivery, including face-to-face training and facilitation, technology-based learning, coaching, mentoring, and social and collaborative learning. There is also expert guidance on learner engagement, including insights from neuroscience and psychology, as well as advice on evaluating the impact of L D. With case studies, activities, and examples throughout, this new edition is an indispensable guide for students and new practitioners alike. Online supporting resources include lecture slides, annotated web links, and self-test questions.

Developing Skills for Business Leadership Gillian Watson, Stefanie Reissner, 2023-06-03 Split into the core areas of managing yourself and others, transferable management skills, and postgraduate study skills, this is an ideal textbook for CIPD advanced level students and those on non-CIPD business masters degrees. Covering the theory and practice of the key topics needed for successful professional development and practice, *Developing Skills for Business Leadership* includes content on interpersonal and communication skills, managing information and projects in both academic and professional contexts, change management, decision making, managing financial resources, and data analysis. This new edition has been fully updated throughout and now includes new material on building and managing virtual teams, remote and hybrid working arrangements, resolving conflict, organizational learning and development, as well as working across diverse cultures and how to foster inclusion. This book provides everything that students will need to manage teams in the workplace, make sound and justifiable business decisions, and effectively lead, engage, and influence others. Chapters are supported by development zones, examples, case studies, and pause-for-thought boxes to consolidate learning and help students with no prior business experience put the skills into context and see how they apply in the workplace. Online resources include a student guide, PowerPoint slides, lecturer manual, and downloadable templates.
