yearning 37 illustrations **The Big Book of Cyberpunk** Jared Shurin,2023-09-26 A genre defining and redefining collection of the boldest most rebellious and most prescient speculative fiction featuring stories from all over the globe The sky above the port was the color of television tuned to a dead channel Almost forty years ago William Gibson wrote the line that began Neuromancer and a movement that would change the face of science fiction Award winning anthologist Jared Shurin brings together over a hundred stories from more than twenty five countries that both establish and subvert the classic cyberpunk tropes and aesthetic from gritty near future noir to pulse pounding action Urban rebels undermine monolithic corporate overlords Daring heists are conducted through back alleys and the darkest parts of the online world There s dangerous new technology cybernetic enhancements scheming AI corporate mercenaries improbable weapons and roguish hackers These tales examine the near now extrapolating the most provocative trends into fascinating and plausible futures We live in an increasingly cyberpunk world packed with complex technologies and globalized social trends A world so bizarre that even futurists couldn t explain it though many authors in this book have come closer than most As both an introduction to the genre and the perfect compendium for the lifelong fan The Big Book of Cyberpunk offers a hundred ways to understand where we are and where we re going The Tender Cut Patricia A. Adler,Peter Adler,2011-08-22 Cutting burning branding and bone breaking are all types of self injury of the deliberate non suicidal destruction of one s own body tissue a practice that emerged from obscurity in the 1990s and spread dramatically as a typical behavior among adolescents Long considered a suicidal gesture The Tender Cut argues instead that self injury is often a coping mechanism a form of teenage angst and expression of group membership and a type of rebellion converting unbearable emotional pain into manageable physical pain An important portrait of a troubling behavior The Tender Cut illuminates the meaning of self injury in the 21st century its effects on current and former users and its future as a practice for self discovery or a cry for help P 4 of cover The HTML of Cruciform Love John Frederick,Eric Lewellen,2019-03-12 The topic of the Internet is vastly underrepresented in the current literature on the intersection of technology and theology Studies on Internet theology are certainly viewed as a topic of special interest relevant it might be thought only to eccentric academics and tech geeks Yet this book contends that there is no topic more pertinent to our daily walk as contemporary followers of Jesus Christ than the theological implications of the Internet The twelve essays of this volume though standalone pieces also work in conjunction to investigate the themes of community and character formation in the digital realm A host of interrelated sub themes are represented in the book including the application of patristic theology to contemporary Internet praxis a demonology of the Internet virtue ethics in cyberspace and studies that consider the implications of Internet technology on aesthetics personhood and the self Together the chapters work toward a collaborative constructive cruciform theology of the Internet The Internet is more than a supplementary component to our personal lives rather it is a medium of vital connection for the digital communion of the saints through the HTML of cruciform love Polyphonic Selves Valerie V. Webbing Cyberfeminist Practice Kristine Blair, Radhika Gajjala, Christine Tulley, 2009 This is the first book collection to devote itself exclusively to issues related to women s lives in a culture of technology As such it is a key addition to feminist new media scholarship in computers and composition The book holds special appeal as the editors have put into conversation chapters of authors from diverse disciplines The value that is placed on cross disciplinary work is further demonstrated in the mix of theoretical pedagogical and rhetorical research that enriches the book in its entirety To explore the variety of cyberfeminist webs the collection has been organized around three themes Chapters in Forming Virtual Kinships examine cyberfeminist practices that do not neatly operate in standard academic communities such as classrooms or cultural centers instead foregrounding the extent to which female communities evolve around aspects of women s daily lives as mothers consumers and workers Chapters in Redrawing Academic Boundaries offer a glimpse of practice within more defined

pedagogical spaces providing a sense of the ways in which classroom and community network boundaries are often blurred and disrupted Last the text moves to explore how cyberfeminist webs both on the beyond the borders of standard spaces are developed using a variety of theoretical standpoints *Transforming Technologies, Altered Selves* Raul Pertierra,2006

Cyberfeminism in Northern Lights Malin Sveningsson Elm,Jenny Sundén,2007 What does it mean to study supposedly global media phenomena from a Nordic perspective In which ways could a Nordic feminist perspective on digital media make a difference in relation to dominant research traditions What would be particular and unique about Nordic cyberfeminism compared to the oeuunmarked version of cyberfeminism dominating the field today These are some of the questions that this book sets out to answer *Cyberfeminism in Northern Lights Digital Media and Gender in a Nordic Context* pushes the boundaries of contemporary cyberfeminism significantly Against the background of an expanding body of research in the field of digital media and gender which to this date has primarily been carried out from an Anglo American perspective the book argues that feminist studies of digital media need to become more inclusive and aware of their own geographical and cultural biases and limits The book takes as its point of departure the knowledge and experiences from the Nordic countries Norway Sweden Finland Iceland and Denmark Although often grouped together under the assumed homogeneity of Scandinavia there are important differences between the countries but also certain qualities and aspects that run across national borders which make for an intriguing foundation of this book Highlighting the work of several of Scandinavia s best internet researchers this collection shows how our understanding of the intersection of gender and computer technology is both universal and cultural It s fascinating reading for anyone interested in questions of gender culture or social aspects of the internet and serves as a useful corrective for those who assume these issues can be understood without considering them from multiple cultural positions TM Nancy Baym Associate professor of Communication Studies University of Kansas This is a very illuminating unconventional and agenda setting collection of essays by a new generation of scholars Very Nordic in its pragmatic approach egalitarian spirit and scholarly excellence it manages to strike a global note The range depth and scope of the theoretical concerns coupled with the originality of the themes discussed casts a new light on a number of crucial issues in feminist cultural studies of science and technology A delight to read TM Rosi Braidotti Distinguished professor in the Humanities Utrecht University *Korean Anthropology* ,2003 Korean anthropology holds a unique position in the field of anthropology having first developed with native scholars studying native culture under the prevalent influence of cultural and social anthropology rather than with the past Western practice of studying the others This volume *Korean Anthropology Contemporary Korean Culture in Flux* presents 30 original articles covering all aspects of Korean culture seen through the distinct viewpoints of various scholars Intended to be an introductory yet comprehensive collection of readings on Korean culture it will stimulate **Cybersexualities** Jenny Wolmark,1999 Cyberspace the cyborg and cyberpunk have given feminists new imaginative possibilities for thinking about embodiment and identity in relation to technology This is the first
