Cyber Way 36fl:

Robotics and Automation in Industry 4.0 Nidhi Sindhwani, Rohit Anand, A. George, Digvijay Pandey, 2024-02-09 The book presents the innovative aspects of smart industries and intelligent technologies involving Robotics and Automation. It discusses the challenges in the design of autonomous robots and provides an understanding of how different systems communicate with each other, allowing cooperation with other human systems and operators in real time. Robotics and Automation in Industry 4.0 Smart Industries and Intelligent Technologies offers research articles, flow charts, algorithms, and examples based on daily life in automation and robotics related to the building of Industry 4.0. It presents disruptive technology applications related to Smart Industries and talks about how robotics is an important Industry 4.0 technology that offers a wide range of capabilities and has improved automation systems by doing repetitive tasks with more accuracy and at a lower cost. The book discusses how frontline healthcare staff can evaluate, monitor, and treat patients from a safe distance by using robotic and telerobotic systems to minimize the risk of infectious disease transmission. Artificial intelligence (AI) and machine learning (ML) are looked at, and the book offers a comprehensive overview of the key challenges surrounding the Internet of Things (IoT) and AI synergy, including current and future applications with significant societal value. An ideal read for scientists, research scholars, entrepreneurs, industrialists, academicians, and various other professionals who are interested in exploring innovations in the applicational areas of AI, IoT, and ML related to Robotics and Automation.

Cyber Security Matt Reyes, 2019-10-10 Want to Keep Your Devices and Networks Safe from Cyberattacks with Just a Few Easy Steps? Read on. Technology can seem like a blessing or a curse, depending on the circumstances. Giving us extraordinary capabilities that once weren't even imaginable, technology can make life better on all fronts. On the flip side, maybe you've heard or even uttered yourself the frustrating refrain of "great when it works, when your device isn't working quite as it should." And no doubt, you've heard about the serious problems that viruses and cybercriminals cause for people and their technology. Cyber attacks are a growing problem that's affecting an increasing number of devices and people. The current numbers are staggering: Hackers create and deploy over 300,000 new malware programs every single day on networks, individual computers, and other devices. And there are nearly half a million ransomware attacks every year. Malware threats come in a number of forms, including spyware, viruses, worms, bots, and trojans. Ransomware is a unique scenario where people hold your computer or system for ransom. The problem is only going to get worse for the simple fact that the number of vulnerabilities is increasing. More and more of your devices are tied into the same network. Keep in mind, your security is only as strong as your weakest link, and it's doubtful your coffee maker has the same level of protection that your cell phone does. Every device or function you add to your network is another potential security vulnerability, inviting in new attacks. These prevalent risks include computers, smartphones, voice assistants, email, social media, and public WIFI. There are also some lesser-known risks. For instance, when was the last time you thought about your key fob being hacked? In this environment, preventative measures can

go a long way to protect your devices and avoid costly cleanups The problem may seem abstract and far away like it won't happen to you But unfortunately hackers don't discriminate organizations from individuals or the other way around when they are looking for their next target Most people fall in the common trap of neglecting the danger until it happens to them By then the solution has become much more expensive The average cyberattack cost for a small business is 8 700 In the US the average cost per lost or stolen records per individual is 225 The good news is that with a few precautions and prescribed behaviors you can reduce these risks dramatically Understanding how to protect yourself against these attacks in the first place is key Cyber Security educates you on these threats and clearly walks you through the steps to prevent detect and respond to these attacks In Cyber Security you'll discover How vulnerable you are right now and how to protect yourself within less than 24h A simple straight forward security framework for preventing detecting and responding to attacks The most damaging but hard to detect attacks and what to do about it Which unexpected device could be attacked and have life threatening consequences Different types of malware and how to handle each effectively Specific protection actions used by the FBI and CIA that you can take too Security dangers of popular social media networks unknown to most users but regularly exploited by hackers And much more A lot of people resist securing their technology because it can be overwhelming It's not clear where to start and it can be confusing frustrating and time consuming The key is to keep it simple and manageable If you want to protect your devices and networks from cyberattacks scroll up and click the Add to Cart button right now
