*The Art of Paper* Caroline O. Fowler, 2019 The untold story of how paper revolutionized art making during the Renaissance exploring how it shaped broader concepts of authorship memory and the transmission of ideas over the course of three centuries In the late medieval

and Renaissance period paper transformed society not only through its role in the invention of print but also in the way it influenced artistic production. *The Art of Paper* tells the history of this medium in the context of the artist's workshop from the thirteenth century when it was imported to Europe from Africa to the sixteenth century when European paper was exported to the colonies of New Spain. In this pathbreaking work, Caroline Fowler approaches the topic culturally rather than technically, deftly exploring the way paper shaped concepts of authorship, preservation, and the transmission of ideas during this period. This book both tells a transcultural history of paper from the Cairo Genizah to the Mesoamerican manuscript and examines how paper became Europeanized through the various mechanisms of the watermark, colonization, and the philosophy of John Locke. Ultimately, Fowler demonstrates how paper as refuse and rags transformed into white surface informed the works for which it was used, as well as artists thinking more broadly across the early modern world.

**Paperart** Michael G. LaFosse, 1998. Presents examples of paper art focusing on the three categories of folded paper, assembled paper, and working from pulp, and includes photographic demonstrations that show the artists at work, as well as a directory of schools, special paper-related programs, and Web sites.

**The Manufacture of Paper** R. W. Sindall, 2022-06-02. In *The Manufacture of Paper*, R. W. Sindall presents an exhaustive exploration of the intricate processes involved in paper production, marrying technical proficiency with an accessible narrative style. Sindall delves into the historical evolution of papermaking, tracing its origins from ancient China through to the industrial age, while artfully interspersing scientific analysis of raw materials, machinery, and environmental impacts. By intertwining these themes, the work not only illuminates the complexities of the craft but also situates paper manufacture within broader societal and industrial contexts. R. W. Sindall, a prominent figure in both environmental studies and industrial history, has long been fascinated by the interrelationship between technology and society. His background in engineering and commitment to sustainability have shaped this work, prompting him to consider not just the mechanics of paper production but also its ecological ramifications. This dual lens allows Sindall to advocate for practices that preserve natural resources while honoring the rich tradition of this essential craft. For readers intrigued by the fusion of history, technology, and

environmental conservation The Manufacture of Paper is an essential addition to their library Sindall s thorough research and engaging prose invite both specialists and lay readers alike to consider the significance of paper in our daily lives while provoking contemplations on sustainable production in an ever evolving landscape
