Clarke** Gary Westfahl, 2018-06-14 Already renowned for his science fiction and scientific nonfiction Arthur C Clarke became the world s most famous science fiction writer after the success of 2001 A Space Odyssey He then produced novels like Rendezvous with Rama and The Fountains of Paradise that many regard as his finest works Gary Westfahl closely examines Clarke s remarkable career ranging from his forgotten juvenilia to the passages he completed for a final novel The Last Theorem As Westfahl explains Clarke s science fiction offered original perspectives on subjects like new inventions space travel humanity s destiny alien encounters the undersea world and religion While not inclined to mysticism Clarke necessarily employed mystical language to describe the fantastic achievements of advanced aliens and future humans Westfahl also contradicts the common perception that Clarke s characters were bland and underdeveloped arguing that these reticent solitary individuals who avoid conventional relationships represent his most significant prediction of the future as they embody the increasingly common lifestyle of people in the twenty first century

 life Arthur C Clarke 1917 2008 was distinguished in many fields as science and science fiction writer inventor television  
 presenter film consultant pundit and futurist He was launched into world wide recognition through Stanley Kubrick s 1968  
 film 2001 A Space Odyssey based on Clarke s work and he became our most prominent spokesman of his generation for the  
 promise of space exploration Born in Somerset in 1917 Clarke became one of the first members of the British Interplanetary  
 Society After serving as a RAF radar specialist in WWII he began writing in earnest and became a professional writer by the  
 early 1950s As the author of more than 20 novels 100 shorter works of fiction four major fiction series 30 non fiction books  
 and hundreds of miscellaneous pieces Clarke s legacy is secure as Godfather of the Communication Satellite and Prophet of  
 the Space Age For this deeply researched biography Neil McAleer conducted dozens of interviews with Clarke s friends and  
 colleagues had access to the Clarke Papers and worked with Clarke himself in the preparation of the manuscript An early  
 edition of this authorized work was published in 1992 but the text was much expanded by more than a dozen new chapters  
 for a limited edition in 2012 The work has now been brought up to date and includes many new photographs added for this  
 new edition in celebration of the centenary of the birth of Sir Arthur C Clarke      **Profiles of the Future** Arthur Charles  
 Clarke,2000 This book originally appeared in 1962 and was based on essays written during the period 1959 1961 Since it was  
 concerned with ultimate possibilities and not with achievements to be expected in the near future even the remarkable  
 events of the last decade have dated it very little But Arthur Clarke has gone over the book making corrections and  
 comments where necessary in order to bring it right up to date The author amongst many fascinating excursions into what  
 the future may hold discusses the fourth dimension and the obsolescence of the law of gravity the exploration of the entire  
 solar system and the colonisation of some of its seas will be mined for energy and minerals and asteroids will be pulled to Earth  
 to supply needed materials men already bigger than they need be may be bred smaller to be more efficient on less food
