Data Warehousing and Knowledge Discovery Yahiko Kambayashi, Mukesh Mohania, A Min Tjoa, 2003-05-15 The Second International Conference on Data Warehousing and Knowledge Discovery DaWaK 2000 was held in Greenwich UK 4-6 September. DaWaK 2000 was a forum where researchers from data warehousing and knowledge discovery disciplines could exchange ideas on improving next generation decision support and data mining systems. The conference focused on the logical and physical design of data warehousing and knowledge discovery systems. The scope of the papers covered the most recent and relevant topics in the areas of data warehousing, multidimensional databases, OLAP, knowledge discovery and mining, complex databases. These proceedings contain the technical papers selected for presentation at the conference. We received more than 90 papers from over 20 countries and the program committee finally selected 31 long papers and 11 short papers. The conference program included three invited talks: namely, A Foolish Consistency: Technical Challenges in Consistency Management by Professor Anthony Finkelstein, University College London, UK; European Plan for Research in Data Warehousing and Knowledge Discovery by Dr Harald Sonnberger, Head of Unit A4 Eurostat, European Commission; and Security in Data Warehousing by Professor Bharat Bhargava, Purdue University, USA. Data Warehousing and Knowledge Discovery Alfredo Cuzzocrea, Umeshwar Dayal, 2011-08-19 This book constitutes the refereed proceedings of the 13th International Conference on Data Warehousing and Knowledge Discovery DaWaK 2011 held in Toulouse, France, in August-September 2011. The 37 revised full papers presented were carefully reviewed and selected from 119 submissions. The papers are organized in topical sections on physical and conceptual data warehouse models, data warehousing design, methodologies and tools, data warehouse performance and optimization, pattern mining, matrix based mining techniques and stream sensor and time series mining. **Data Warehousing and Knowledge Discovery** Il-Yeol Song, Johann Eder, Tho Manh Nguyen, 2008-08-30 Data Warehousing and Knowledge Discovery have been widely accepted as key technologies for enterprises and organizations as a means of improving their abilities in data analysis, decision support and the automatic extraction of knowledge from data. With the exponentially growing amount of information to be included in the decision making process, the data to be processed is becoming more and more complex in both structure and semantics. Consequently, the process of retrieval and knowledge discovery from this huge amount of heterogeneous complex data constitutes the reality check for research in the area. During the past few years, the International Conference on Data Warehousing and Knowledge Discovery DaWaK has become one of the most important international scientific events to bring together researchers, developers and practitioners. The DaWaK conferences serve as a prominent forum for discussing the latest research issues and experiences in developing and deploying data warehousing and knowledge discovery systems, applications and solutions. This year's conference, the 10th International Conference on Data Warehousing and Knowledge Discovery DaWaK 2008, continued the tradition of facilitating the cross-disciplinary exchange of ideas, experience and potential research directions. DaWaK 2008 sought to disseminate innovative principles, methods, algorithms and solutions to challenging problems faced in
